ILoveMyLaser.com

The Scalar Wave Laser System is indicated for temporary relief of minor muscle and joint pain, arthritis and muscle spasm, relieving stiffness, promoting relaxation of muscle tissue, and temporarily increasing local blood circulation. The System is not intended to diagnose, treat, cure, mitigate, or prevent disease. If you have a disease or medical condition, consult with your physician or health practitioner before using the Scalar Wave Laser. Use only as directed. Uses for medical indications contrary to the FDA registration are unauthorized and render the warranty null and void. To protect the Scalar Wave Laser System FDA registration, unauthorized claims may result in legal action, including civil claims and loss of opportunity to market the Scalar Wave Laser System. REV 11.1.11

My life has been filled with physical trauma. It started with domestic violence when I was a child and suffered my first of 7 concussions. Continued by having many accidents ranging from totaling my Volvo with a truck, bad wipe out with my boogie board and huge wave, several car accidents including a head on, and more. One could say I had a death wish. Consistent pain was in my back, neck, shoulders, head, and sharp pains from low back down both of my legs, and hip pain too. For the past few decades I had a mission to get out of pain. My nervous system was shot so I had PTSD to boot! I've spent tens of thousands of dollars and at least 30% of my precious time to get better health and put freedom and fun back into my body and life. I've traveled to Brazil to see the famous healer John of God, to weekly visits of receiving bodywork of all kinds. Some modalities were deep tissue, acupuncture, chiropractor, physical therapy, cranial sacral, energy work, osteopaths, Rolfing, and more. Western doctors wanted to give me pain pills, I refused. I finally found something that is working more than anything I have ever tried, it is the Quantum Laser. I have been using this laser 2 times a day for just over 3 months. Before using the laser my daily chronic pain level was rated 4-8 and 10 being the most painful (like being hit by a truck). Sometimes I felt so hopeless and depressed I would say to God "if my life is like this now and getting worse as I age I wanted to die." **Now my pain level is reduced to a 1 and moving toward 0. No more waking up with pain!!!** I had Thermography, kind of a safe x-ray done. (it is some kind of pro-active imaging that is non toxic where they find problems in your body in early stages) before and after my using the laser and now I have scientific proof of the reduction of inflammation in my body about 50%-70% in less than 3 months. My team of healers noticed that my body has improved and several of them had a look of bewilderment when they saw how different my body is. Even my eyelashes have grown thicker and longer since my thyroid is balancing itself out. My adult daughters asked me if I had cosmetic work done, and almost didn't believe me when I said no. They say I am looking about 10-15 yrs younger. I even did 9 cartwheels straight in a row on the beach the other day! One more thing, I have shared this with several friends and they shared the magic light with others. By me sharing my story and laser over 30 lives have been changed for the better. I am making a real difference when people are getting out of pain and have hope again. My life and other lives had been transformed. I am eternally grateful for Paul and Lily making this possible. I have the gift of Joy, strength, and flexibly back in my body and this is a major blessing. Thank you!

- Dale B.

I bought my laser on April 18, 2009 when Paul and Lillie did a presentation in Hollywood, FL. I was delighted with the idea that it would help me with the lack of sleep and muscle pain from my having fibromyalgia. I was diagnosed with this condition several years ago and nothing has worked. As a woman, I was also motivated by vanity because I heard that it could help you look younger and delay aging. July 4th was going to be my 63rd birthday, so I decided this was going to be my birthday gift. I was so excited with all the things the laser was suppose to do for my well being that I wanted to share with my friends and I asked Lillie if they could come to Miami and I would host a Gathering. It was scheduled for May 31st. On the morning of May 17, two week before this event, I was walking toward my car when a SUV, going on reverse, hit me from the back causing me to fall. The SUV then rolled over my left foot. After an ambulance ride to the hospital and a long day of x-rays, I learned that I had multiple fractures in my left foot. They put my foot in a temporary cast, gave me a prescription for pain relief, a referral to see an orthopedic surgeon, and sent me home. As soon as I got home I thought that the Scalar Wave Laser might help with the pain. I placed the red probe inside the cast through the front opening. I used it all night and, to my delight, it reduced the pain so much that I didn't even have to take an aspirin. Nothing at all. Every time I started to have pain I ran another session with the Red Probe. The next day I went to see the orthopedic physician I was referred to. After more x-rays the

doctor came to the room with his assistant and said, "I have news for you, you may have to have not only one surgery but maybe two, and I can not promise you that you will walk again the same way you did before the accident." As soon I heard him, I said to myself "He is not going to see me again, because if he does not trust in himself on the outcome of the surgery he wants to do on me, why should I trust him?" After I returned home I scheduled a 2nd opinion with one of the best orthopedic surgeons in Florida. After that visit, it was confirmed that, due to multiple fractures, immediate surgery was necessary. He also asked me what medication I was taking for the pain to which I replied "nothing, I am using a laser". Apparently he did not believe me and gave me another prescription for the pain. I never filled the prescription because I did not need it. I continued using my red probe and laser for the pain. It was working well, I had no pain, and was able to sleep like a baby without any problem. I was worried because I was the hostess for the first gathering in Miami, which was now less than a week away, and I was in a wheel chair. No one from the company knew about my accident because I did not want to reschedule the Gathering as so many people in need were looking forward to meeting Paul & Lillie. In the mean time I was using my laser like crazy, day and night, and there was still no pain. I had no idea at the time that the laser was moving the bones, little by little, back into alignment. When I returned to the orthopedic surgeons office for a follow-up, the surgeon and his assistant were viewing the new x-rays and kept asking for the previous x-rays because, they said, "the bones were much closer than was expected". He looked at me, and said, "**I don't know what you are doing, but keep doing it, because you may not need to have the surgery**". He even wrote in the record about my positive attitude and that I refused to take medication for pain. After that appointment I returned to my primary physician who requested a NEW set of new x-rays to be sure everything was fine. The result? **They stated that there was no evidence of previous injury in that foot.** Amazing!!!! I CAN WALK AND DANCE THE MERENGUE WITHOUT ANY PROBLEM!!! THANK YOU PAUL & LILLIE for the Scalar Wave Laser!

Dr. Hortensia N. Ph.D.

The Scalar Wave Laser is a remarkable device. I have seen amazing results with many different conditions, beyond musculoskeletal ailments, therefore broadening the scope of patients our office has been able to help. The use of the Laser has created a successful additional income stream, but most importantly, the greatest wealth has come from the happiness and smiles of patients that have experienced relief and freedom from their ailments and conditions. Without saying, this has generated many "word of mouth" patient referrals. A huge asset to any practice! I personally would no longer be without it!

- Dr. Michael CHIROPRACTOR

A friend who owns a local health food store and does Biofeedback told me she has a rotator cuff injury and strong pain. I suggested we try the laser on it. She was so pleased that she rented one for a week. She watched the intro video on my site and I shared the testimonials & clinical studies booklets with her and had her speak with a practitioner from my support team. She missed it so much when it was gone that she bought a package for herself and to use on her clients.

- Libbie H.

I had a severe pinched nerve in my neck that radiated intense pain in my right shoulder blade. This reduced the strength in my right arm to about 20% and my entire arm would go numb and my hand would contract (like a charley horse) several times a day. My doctor told me that the nerves had been damaged and would not regenerate. I used the laser and the red probe on my neck, with Unwind and Cell Regeneration settings, twice day for about five weeks. The pain was reduced after the first treatment and my arm is back to normal now.

Another amazing experience with the laser was after I took a long barefoot walk on the beach in Hawaii. By the time I returned to my hotel room the hot sidewalks and sand had burned the bottom of my feet, and they had filled up with liquid. I fully expected to lose the skin after draining the liquid. I used unwind for about 10 minutes per foot that morning and again that night. The next morning the liquid had completely reabsorbed, but the skin was still loose. I repeated the unwind treatments that morning and night. The next morning the skin had completely reattached to my foot and both blisters healed without the skin dying and having to be removed. I now have a new Doctor who doesn't write prescriptions for drugs... Dr. Scalar Wave! THANK YOU PAUL & LILLIE FOR THIS AMAZING GIFT TO MANKIND.

- Kevin J.

Sunday night my husband went out to walk the dog. He lost his footing on the false curb, fell forward and landed on

side of face, smashing his hand into chest/ribs, and skinning his knee. He was pretty shaken and unstable. Walking after that there was a great deal of pain, discomfort. Immediately, I worked the Laser on the various areas where he was feeling the most pain, particularly his lung/chest area for breathing difficult. Within an hour, his pain was reduced by about 75%. He was able to sleep the night in spite of the rib being out of place & got to the chiropractor on his own the next morning. Programs used: Unwind, Quantum, Cohere, Lung. This is truly an amazing tool!

- Cheryl V.

I was medically diagnosed with a torn meniscus in my right knee and surgery was prescribed. Since using the Scalar Wave Laser for three one-hour sessions, I have observed no more symptoms or popping and burning. I continue to use the laser once a week for four minutes as a touch up. I am no longer limping and I feel more confident since the pain has been gone for over two months. I love my laser and so appreciate the healing I have received due to its amazing effective healing technology.

- Harvey P.

My husband has had ongoing foot infections (off and on) since he was in Desert Storm. With ten days of Scalar Wave therapy to his feet, the condition was completely resolved. This was a real "SEE THE DIFFERENCE" change. I was diagnosed with a multi-nodular goiter and hypothyroidism. My doctor prescribed thyroid replacement so I could get off bed and combat depression and obesity. After using the laser, I now have normal thyroid functions test results, no depression, and much more energy and have enjoyed significant weight loss.

- Julie R.

I had an invitation from Joyce T. (a former health clinic client) to listen to a Scalar Wave session. Fortunately, after trying it on Unwind for 20 minutes on my neck the lump that had been there for 40+ years dissolved. When I first entered the hotel for the seminar, I could hardly go up the stairs to the event; my left foot and leg hurt. Now, it disappeared. I can now walk up or down the stairs pain free. I also sleep better, my digestion, and elimination is normal. I highly recommend the Scalar Wave laser from my personal experience. I have had ten years training and experience with Erchonia and Clarius brand lasers, and can attest to the fact that the Scalar Wave laser technology is extremely effective.

- Hilda W.

I had some bad tooth pain last week, thought I would need to go have the root canal done. I put the laser on Unwind and the pain has gone away! Also use the laser on Sleep for 4 minutes before bed. WOW!!!

- Chris A.

I have had chronic earaches since childhood. The Scalar Wave laser has taken away pain in my mastoid and slowed down the drainage to a manageable level. My immune system is so much stronger and my sinuses are clear.

- Kristy

When I arrived at the presentation last night, I was very uncomfortable from low back and right hip pain. During the evening I ran the UNWIND program and then focused the laser on my right hip. On the way home, I was aware of some kind of movement of energy in my entire pelvic girdle. By the time I got home, I was feeling very relaxed and in NO PAIN. And I was starving! SLEPT LIKE a baby!

- Beth W.

For many years I've dealt with getting in and out of bed with great difficulty and pain. I've been to the chiropractor and orthopedist for help, and only received minimal relief. At that time the pain would come and go in my lower back. I couldn't sit for more than 30 minutes without pain. I also had acupuncture done with little relief and in total, saw six different chiropractors and finally found one I got some relief from. I had MUA (manipulation under anesthesia) done and it helped. I could then go up steps and sit through a movie and not limp when leaving. I met Cathy S. and was absolutely amazed when I left with no pain! I saw Cathy several times after that, and ended up buying my own laser in March 2010 prior to my trip to Europe. I was fearful of being in constant pain after sitting so long on the plane and walking around Europe, but now believe that won't be a problem at all. I love my laser and share it with others in pain. THANK YOU PAUL!

- Robbie W.

I had hip (back) pain at least once a week. When I visited my friend, she used the Scalar Wave laser on me for about 20 minutes. After the treatment, I stood up, and the pain was gone. I was so surprised! I felt I had definitely experienced some special power.

- Masaji T.

My mom has a fractured spine from an 18-wheeler rear-ending her at 85 mph. She had a hip replacement, arthritis and osteoporosis. The laser is capable of totally making her **intense** pain dissipate. The first two weeks, it helped her start walking better by alleviating the pain. Pain comes and goes but at night she takes the laser to bed, and she wakes up pain-free. She is hopeful that her bones will heal and her walking becomes easier and permanently free of pain. She was a major skeptic when she started.

- Billie P.

I tried the laser on my foot during the two days I attended seminar. I always had pain in my feet when walking, and couldn't walk barefoot at all. For the first time, I was able to walk around the house barefoot. I don't have any pain in the foot, which was constant before. Also, I'm not feeling as stressed. It seems like my body is more relaxed.

- Lisa T.

When I was ten years old, I fell on the stairs and hurt my back/tailbone area. Ever since then I have always felt my lower back was locked up, but I had dealt with it for so long I thought it was just bad breeding. When my lower back loosened and let go, I really felt the new flow of energy affect my body like a small dam breaking and a warm nourishing liquid filling my body.

- M. M.

My son Jackson damaged his knee so severely it required surgery. He followed the rehab process faithfully. His surgeon explained it would never be like before and his pain and limited range of motion would be permanent. He discovered Scalar Wave laser and treated his knee for a month. He is now pain free and has complete range of motion.

- J. Mack S.

A young client in the first day of her menstrual cycle had pain so bad she had to stay home from school or work. Generally going to bed. We used the laser on unwind on the five main points, then over her ovaries. She went home happy and pain free. Has been back one other time, but feel she is now free of the discomfort.

- Jeanette S.

I absolutely love my laser. I have owned it now for 6 months. My health challenges over the past 13 years have been related to autoimmune illnesses...Lupus and RA. Since purchasing the laser I have not only had decreased joint pain involvement, but joints that were unstable from erosion due to years of swelling and disease aggression are getting stronger and becoming more stable. My husband uses the laser as well and was treating a chronic fungal infection on both his great toes. The nail has now begun to grow in normally and the unsightly black discoloration has gone. In the process we noticed that he has begun to grow new hair in the balding spot on the top of his head! I have shared my laser with my friends and family and they are amazed at how calming the unwind protocol makes them feel. It has help ease pulled muscles, rib pain, etc. I believe it should be part of everyone's home first aid kit.

- J. O.

A few weeks ago I got introduced to the Scalar Wave laser in my hometown. During the meeting we got to try the Laser. My lower back is for years (accident at 12) in constant pain. After the meeting I was for 1 ½ days pain free. I'm looking forward to more pain free days after purchasing a laser.

- Martha C.

We have a lady in Manitoba that burnt herself so badly, she was scheduled for skin grafts and extreme reconstructive surgery. After 2 weeks of 3 hours/day she is back to her job as a music teacher, and the doctors are completely dumbfounded and amazed. Her hands were burnt to the bone and 2 weeks later, you can hardly tell aside from some pink skin.

- Jalquoi A.

I am 15 years old, and for the past two years, I have gradually developed kyphosis. About two weeks ago, I visited a specialist for my back, and they informed me that there was a very slim chance that my condition would improve. They fitted me for a brace (which I did not like) and I began to believe I would live in pain forever. A week ago my friend told me about the laser, and thought it might help me. I was a little skeptical at first, but agreed to abandon the brace idea and come this weekend to see what it was all about. I have to say, that after last night, my back has definitely improved and most of my pain is subsiding. This laser is amazing! I hope my parents come home with one.

- Dorian P.

About a year ago I was having problems with my lower back and legs, caused by a narrowing of the spinal canal. Affecting the L4&5 spinal vertebrae, causing the nerves specifically the sciatic nerve, to be pinched, causing at times various levels pain and disability in my legs and lower back. I was prescribed several medications ranging from morphine, codeine, and many other pharmaceuticals to little success. I was introduced to the Scalar Wave Laser, in October 2009. Since then I have been able to eliminate the need for these pharmaceuticals. The Scalar Wave Laser has reduced my discomfort; I have a greater range of motion, greater physical peace, and the ability for better rest, to a better way of life. Thank-you Paul & Lillie. Continued success on future products.

- Peter & Bambi

I did the laser on cell regeneration on my kneecap as I had injured it, and my knee has stopped clicking and I have no pain now.

- Stan F.

I was recently in a horse riding incident where my shoulder muscles suffered severe strain. I felt like I had been in a car accident. I am new to the laser so with skepticism I tried using it on my sore shoulders. The next morning I woke up completely pain free. I am no longer a skeptic.

- Lynne B.

I like to sit with my feet under me, but it causes severe pain in my knee. I grabbed the Scalar Wave and used the rejuv and sooth program for 12 minutes each. The pain left and did not come back for nearly 4 months. I now use it on a more regular basis just to keep the pain away.

- Shirley R.

The second time I was exposed to the laser I had a wonderful result with hip pain that I had in my right hip for over three years. It felt great to finally be free of this pain, as it had affected my sleep, my endurance, my mood, and my overall well-being. I continue to use the laser for my family and myself, and also in my practice. One of the things I really like about this laser is the transportability. I throw it in my purse like a cell phone, and use it and share it wherever I go. I did a 60-mile walk with 150 other women this summer-I carried my laser with me and used it all along the way. I credit the laser for my being able to finish the walk in a healthier state than I would have without it.

- Dianne P.

My husband and I were under incredible stress. I had also been told I had a fast growing tumor in my ovary and the bones of my mouth were all dying from "cavitations" (I had had extensive dental and orthodontic work done). I was a mess! In May I purchased the laser and red probe. We used it every day and often were impatiently waiting for the other to finish so we could both have our turn on it. My husband and I got through our ordeal and brought closure to the situation. We not only managed our bodily pain during that time, but we both improved. Chronic pain is no longer a part of our daily lives. I continue to "zap" my jawbones. There have been no symptoms from my ovary for months. I am going for my annual medical exam at the end of the month. I expect a clean bill of health. I have a friend who tried the laser while visiting us. He had an old sports injury that had caused him pain daily for 20 years. After about 1 hour on the laser he has been pain free. (that was in August)

- Barbara F.

I have a friend who introduced me to the laser in the summer of '09 following a knee injury. It was an emotional time in which I could not work or garden and basically get on with my life. The laser treatments helped me to relax into a place where I could leave my stress and go to a place of healing. Physically the pain in my knee was erased and I know that prior to the laser I would have perhaps had to endure surgery.

- Bev F.

My mother is 72 years old, and has numerous health challenges. She's had a quarter of her right lobe removed from her lung, which also required Chemotherapy and radiation. Through numerous tests it was also discovered she has an aortic aneurysm (5.1cm). She then had to go back for radiation as some of her lymph nodes became cancerous. Due to all of this, she frequently suffers from generalized pain, swelling in her ankles and arms. Lately, neuralgia has set in her right TMJ (jaw). It is excruciatingly painful. When I first started using the laser in October, after going to a number of presentations I've been encouraged to use unwind and quantum on her. After 4-5 treatments, the pain in my mother's jaw has reduced remarkably. I might also add, that my relationship with my Mom, which can be difficult, has also improved. To see my mother opening up and trusting the process is a gift, which I feel the Quantum frequency has been a catalyst for.

- Lynne P.

Last March (09) I fell into my cupboard and gashed the top of my head 10 inches. I required 25 stitches and was gashed to the skull. After several months of healing my scar begin pulling. I set my laser on unwind and placed it on different parts of the 10" scar or wherever I felt it pull. The pulling disappeared. The next day it came back so I repeated the process and the pull disappeared. Next I went to the scar mode and placed it on the scar area. The pull disappeared for 5 days. I repeated the process on scar mode and the pull has disappeared completely. Yeah!

- Betty-Lou S.

I am ever so pleased that my friend invited me to experience the Scalar Wave Laser. After two short sessions my sciatica is almost pain free and my foot has stopped "burning." Thank you so much.

- Sherry M.

I came to the seminar, with a sinus headache. While using laser on unwind, my sinuses started to drain, and forehead of pain decreased.

- Sharon K.

My niece's partner complains of neck pain, and has been suffering from this for a long time. He didn't believe in alternative methods, and thought they were "rubbish" He tried the laser, and the pain was gone. His pain hasn't returned, and it's been two month. Now he believes.

- Helen S.

As a practitioner I see a variety of client issues. Some resolve or diminish over time, but others are much faster. My next door neighbor hurt herself falling off a jumping horse. For two weeks she resisted her husband's suggestions that she try the laser since it had helped alleviate his own back pain. Finally I convinced her to come over and she could not believe that after 1 session her pain was completely gone and never came back!

- Libbie H.

While caring for my beautiful mother in the last months of her life, I developed a heel spur. I suffered with this terribly painful condition for 5 long months. Shortly after receiving my laser in November '09, it took only 3 sessions on "Unwind" directly on the heel area and the condition has totally disappeared! I also had a large almost "golf-ball" sized fat cell that protruded from my left side. After each session I would run the "Fat Cells" program over it and it has almost completely melted away! My experience with the laser continues to be a journey towards rejuvenation and regeneration that has me very excited! The Scalar Wave Laser is an empowering tool that allows the body to "unwind," delete stress, receive energy for repair and to reach the blissful state of "Still Point." Let There Be Light!

- Cindy R.

My name is Martin and I have been involved with "energy medicine" for many years. I have had the pleasure of giving and sharing my gifts with those people who are open to another method to assist their bodies natural healing rather

than relying only on mainstream medicine. There is a great need for both! In June 2009, I had surgery on my left knee for torn meniscus ligaments and arthritis damage. It really hurt BEFORE the surgery! After the surgery it only seemed to get WORSE. I have a demanding job, and walk a lot throughout the day. As more time passed, things did not improve! To get through the day or to sleep at night, it was common for me to take 21 milligrams of melatonin AND 100-150 milligrams of Demerol for the pain. In Jan. 2010, my wife and I attended a presentation on Lasers in Regina, Sask. A friend of ours had invited us, and I said to myself "Ya, ok" we will go. Good Decision! The day of the presentation, I had taken nothing for the pain, and during the session my left knee started to hurt. The pain level went from a 7 to a 12. Then it really started hurting to the point where the knee went completely numb. It hurt so badly, I had tears in my eyes and almost wanted to cut it off. Yes really that did go thru my mind. One of the organizers of the session let me use one of the demo lasers. After approximately 10-15 minutes, the pain level went down to an eight! (I was willing to keep the leg at that point) I had an opportunity to have a One-hour treatment session with another friend. Going into that session I was at 7-8 pain level. Upon leaving the session the level of pain was approximately four. In Feb. 2010, Gisele and I attended a session with Paul at the Regina Inn, and I used the laser and probes for a long period of time. Going into the weekend, my pain level was at 7-8. After using and working with them, the pain level went to a two! By using the lasers, my "stress" level from the pain, etc. has dropped a lot. My wife has noticed a HUGE difference in me. There is more I could share about my knee and the lasers, but enough is enough! Try the lasers. The only thing you may lose is the pain!!!

- **Martin C.**

I have had a problem with my hip for about three years. Massage therapists, chiro could not pinpoint where the pain was. I purchased the laser in November, and after using it for a few weeks, I do not have the pain anymore.

- **Helen P.**

My mother-in-law has a frozen shoulder as well as major arthritis. She has not really been able to use her arm. After her first session she felt pain free and was actually able to use her arm to help pull herself out of bed the next morning.

- **George C.**

I'm facing back surgery. Had laser treatment, decreased pain level by 70%. Bought a laser and plan to decrease the pain even more.

- **Kathryn H.**

Since using the laser my back pain, getting up 1 to 4 times per night to urinate, taking medicine to stop sinus headaches, migraines, and taking pain medicine to treat my **fibromyalgia** has completely stopped. The laser is the only thing that has helped me to do this in only 1 month. I am working on other things and am very confident the laser will also help me to do this. Thank you for this healing machine!

- **Corey P.**

Ever since I have started using the laser I have not had to take any pain relievers such as Motrin, Advil or even Tylenol. This is amazing since I could not sleep without taking something before bed.

- **Joan M.**

My name is Laurie and I purchase my laser at the end of Nov. 09. I made the decision to purchase my laser after seeing a dramatic change in my brother. He drives truck for a living and came home with his back all jammed. He had one session that lasted approximately 1.5 hours. Upon getting off the table, I saw that his color had change completely. I could see in the days after that session that not only was the pain reduced by 90%, his whole personality changed. He was happier and calmer.

- **Laurie S.**

I am blessed with Chemical Intolerance. It is extreme and life threatening at times. In early April my left foot had a sudden burning pain up to my ankle. The pain was intense, tears were shed. The SCIO told me it was chemical, and gave the name of the chemical. Upon researching it, we found it was an herbicide that the courtyard had been sprayed with that day, and had unknowingly walked through it. The SCIO brought the pain from a 15 to a 10, Frankincense gave me temporary relief. At my 1st Scalar Wave Laser event, I found the setting called "Detox" and

placed the unit over the pain on my foot. After two (4) minute rounds, the pain dropped to 5 and then Paul told me about the Ozone setting! NOW NO PAIN AT ALL! My son-in-law had a bad infected wound on his thumb. He had done 2 rounds of antibiotics by the time I got to him. Dr. was putting fear of MRSA into his head. 3 minutes w/ Scalar Wave and Red probe on Pleo stopped pain reduced swelling. Next day wound was 90% healed. I almost forgot, my melanoma is shrinking and has stopped "Buzzing" I annoy my Doc because I refuse treatments but she is amazed at my progress. She was my third sale and I have promised her not to die before my time!

- Kristy M.

I was in an automobile accident a few months ago and was prescribed medication for the inflammation and pain by a doctor. Of course, the medication gave me very bad side effects and was not effective. A friend loaned me her scalar wave laser for 2 days and I had such wonderful relief, that I had to order my own laser. I have used my laser everyday since I have received it, and I truly love my laser! Everyone should own one!

- Victoria M.

A 78-year-old friend of mine hurt her foot about 21 years ago. When it happened, her right foot ended up twisted backwards under her leg. This caused a major leg and groin injury as well. She was not able to feel her foot properly. It was numb and felt "leathery." After using the Scalar Wave Laser on her foot and the red probe on her leg, she experienced amazing pain relief. She exclaimed that she was going to tell everyone about the Scalar Wave Laser! Two weeks after I bought the laser I tore the meniscus in my knee and was in extreme pain and could not bend or put pressure on my knee. I used the laser on my knee every day on the Unwind protocol. I also used Ligament, Muscle, Relieve, Soothe, Endorphins, and the Spleen meridian. Within four days, my knee felt 85% better, and in one week, 90% better! After two weeks, the pain was 99% gone, and no longer required pain medication or surgery. I was amazed! Wow!

- Jane S.

When she left, she was able to walk normally, without limping, and without any pain! She was very happy!

- Dr. Gail S.

I was diagnosed with a hernia through an ultrasound. Luckily I had been introduced to the Scalar laser and had approx. 12 or 13 treatments on the area. The surgeon wanted to do a second ultrasound to confirm the place of the hernia. This was two months later and it was inconclusive, they could not see the hernia opening. I continue to do treatments to completely heal the area.

- Patti L.

I was preparing dinner and I needed a cookie sheet. My son placed it on my gas stove, beside the pot of water I was boiling. After a time I picked up the cooked sheet and by the time I got it over to the cupboard to drop it, I had a bad burn. I immediately put my hand under water. I was wondering what to do. I knew I couldn't drive my vehicle with a stick shift. I thought about my laser. I put it on for close to 1-½ hours on Pleo, Relieve, Activate, and cell regeneration. Before going to bed I had NO pain and a slight scar. The next day after rewinding, I did the same settings as the previous night plus scar. I went for a run came back looked at my hand—No scar and NO pain.

- Diane R.

I was in the Saskatoon meeting for the first Quantum introduction. I had tried the basic laser on knees that evening during the meeting. I had pain free knees for nearly two weeks. I had attending the Regina meeting Feb 5-7 and purchased our first laser and probe.

- Brian M.

Ten days ago I injured my lower back, pushing a car in a snowstorm. I continually two times daily used my laser on the unwind-adrenals, sacrum and occipital and thymus. My back pain has disappeared.

- Barbara C.

I made a last minute decision to attend the Quantum Laser Seminar in Regina on Friday Feb 5, 2010. Along the way, driving from Winnipeg to Regina, I almost felt like turning back because everything from top to toe was acting

up. My injured shoulder ached; my lower back was so sore I could barely sit in my seat. I was tired and one of the molars in my mouth just started to throb for no reason. I used the laser on every possible part of my body that evening, including my adrenals, sacrum, back of the head, and thymus as directed. By the end of the evening I was feeling renewed, refreshed and significantly relieved of much of my distress. I wasn't totally pain free, but I was on the right path. Even the tooth settled down so that I could sleep that night. Cranky and miserable renewed into happy and content.

- Debra B.

I used the Quantum laser all day yesterday on my elbow which gives me pain when turning a doorknob or carrying things, moving in different situations- I must admit it does feel very relieved today and is not as sore and inflamed as before using the laser. I also used it to open up adrenals and other glands. I slept better last night to my disbelief!

- Shari S.

I have had numerous broken bones and initially bought the laser to use on my clients but it makes such a difference in my own feet that I use it daily on myself and am officially pain free! Unwind and Quantum directly on my feet for 4 min each and I feel immediate relief.

- Jacqui A.

Immediately upon putting the laser on my back I felt a sense of calmness. I wanted to try it on my lungs because I have had some serious scar tissues that tend to bleed when they are irritated. I normally cough from the moment I get up in the morning throughout the night and all day. When I slept that night for the first time in years I felt like I could breathe a bit easier and slept throughout the night without coughing. This is definitely the protocol that I have been searching for. Thank-you.

- Gisele C.

What an incredible quantum tool for self-empowered healing!! Thank you so much Paul and Lillie. I have had nothing miraculous results with all my clients, family and friends with the Scalar Wave Laser. I am most impressed with how my 14 year old son had ripped a large chunk of skin from the inside of his palm and instead of asking me to nurse it for him, he went straight to my laser bag and proceeded to treat himself with three programs of four minutes each. He "then" came to show me how the bleeding had stopped and how the first layer of skin had formed over the wound. Wow, the Scalar Wave Laser provides an opportunity for a new generation to have a tool to be self-empowered in their own healing process.

- Monica N.

After by-pass surgery my husband was on a trach. When the trach was removed, he was unable to swallow. The speech therapist said that 5% of the people who have a trach never regain their ability to swallow and she felt that he was one of the 5%. I called a friend, and asked what we should do? He suggested Unwind, Quantum then do Ligaments and Muscle on both sides of his throat. I did, and he swallowed the next day. I continued the treatment every day for one week. His throat was x-rayed and the technician said, "this is impossible, it's like a miracle, I am looking at a new throat." After one week, all the cells in the throat had completely regenerated.

- Kathryn F.

I used the laser for four minutes on each side of the head of a friend of mine who had migraine headaches since 1994. He also had a brain tumor taken out in 1996. I saw him a month or so later, and he informed me that he has had NO HEADACHES since the laser treatment.

- Nancy L.

A woman came to see me with severe pain and physical limitation. She is on disability from a career of journalism, has been unable to write, use the computer or travel for several years. After a one-hour session using Neurons, Unwind, Pleo and Ozone, she was able to move her "frozen shoulder" for the first time in years. Her pain has improved from 8 out of 10 to a two. She has not used any pain medication since, and is now full of life after two weeks.

- Valentina K.

A young man age 32 is sent to emergency three times. He had chest pains, high blood pressure. He was in fear of having a heart attack. I used the laser on him, on unwind and quantum, and miracle. He was due to go in the hospital two days later to get stents put in his heart. When he met with his doctor two days later, it was determined by the doctor that he did not need any medical procedures.

- Eht-EI T.

We received our laser and red probe last Monday. Upon sharing some info about scalar wave energy and waiting while my slow boil Swedish husband to consider it and purchase it for us we studied more and learned to use unwind, quantum, and all essential settings. Although a skeptic after a 1.5 hr treatment as stated above, my husband had pain relief and more energy directly. He is now a convert and ambassador.

- Lief & Michelle J.

Reconstructive Foot/Toe Surgery = Healing occurring 3x faster! This is second such surgery I have undergone-exact surgery same. Stitches grew over before being taken out because medical system has a schedule 1 stitches should have been taken out in 1/3rd the time. After two months of repeated and daily use, I have healing akin to 6 months on the last same surgery. (I now have limited swelling and pain and have mobility and range similar to a much longer healing time.

- Vannette K.

I recently experienced a sensational session of the Scalar Wave Laser. My inquiry was caused by foolishly moving a 25" TV (old style) out to the trash this included my back and shortly after my left knee. In twisting the knee it caused a bone to displace- Harvey had his laser a few days, we decided to try said laser on my knee and we were sitting talking (about 2 minutes) when we heard a pop and my leg went up in the air- (a couple of inches) we both looked at each other in surprise- (at that time I had been sporting around a knee brace) we removed the brace and to our surprise my knee had no pain at that time!

- Helen J. R.

I purchased the laser in Oct of 2009. It is changing my field. I have been unwinding and no matter how crazy my life is I have an inner calmness or Stillpoint as Paul calls it. I feel as though I am observing the madness around me and I take it in and end up laughing about it for it doesn't serve me anymore so I just unwind and go for a walk on the beach and expand. The laser has also helped me with my teeth I have a root canal in left front tooth and a cracked molar it takes away the throbbing and clears the bacteria. Life is a challenge and the laser has allowed everything to flow better for my nervous system and me is so much calmer and I can feel my field shifting and it's a blessing.

Namaste

- Heather H.

When I tried the scalar wave laser for an extended period of time, I began to see noticeable results. I had a "stuck" sacrum that I could not get unstuck with any of my modalities. Wanting to avoid a chiropractic appointment, I used the laser for nearly two hours and by the next day, the sacrum felt perfect and 2 months later, it has remained clear and free from pain. At a different point in time, I have had horrendous headache and wasn't sure I would get through the day. I had the opportunity to put one laser on each side of my neck for two hours. My headache was gone and my neck felt incredibly free.

- Annette M.

My son fell on his elbow. The Doctor's exam lead us to believe that surgery would be needed. The QWL w/ ultra violet probe took 30 seconds to stop pain. Another two minutes apparently inspired his body to heal the injured nerve. He no longer complains about it.

- Kristy Moore H.

The first night after buying the laser my phone ringing and a patient was crying with a headache like none she had ever had-as she talked I put her in my mind in front of me. As she continued to talk, I heard her voice start to change after about 25 min. I ask about the headache, and she said it was "Gone." I then I explained to her what I was doing and about the laser. She was my first sell.

- JoAnn W.

One night something went very wrong with my knee and really I could barely walk—forget about just limping. I went to bed, did the general protocol and then went to the worse area on the knee-unwind, quantum, pleo and relieve. Went to sleep and no problem walking when I awoke.

Zoi H.

I performed a liposculpture recently using the laser before and after the procedure. Usually following the procedure patient would be very sore, inflamed and tender. It would usually take up to two months of lymphatic drainage to experience some comfort. With the laser I was convinced I had a tool that could improve the outcome 48 hr after the surgery. My patient used the laser and the infrared probe combined. She had 2 other sessions before I saw her again. On the 7th day post surgery the result I got was equivalent to 2 months of lymphatic drainage. Patient had absolutely no pain in the 7th day, to the point that 3 family members scheduled for surgery with me.

- Jean-Mario P. MD

My niece has several case of fibromyalgia. I took a week off work and went home to treat her. After 1 basic unwind the first night. The next day she took off her pain patch and was able to do thing she had not done in a while. She is continuing to improve every week and learning.

- Karen S.

fooling around with my son I fell and tore my right knee ACL and meniscus. Literally I felt like my knee was hanging off my upper thigh many Dr's and people said you would never be able to run or walk far distance w/o surgery, my colleague began to laser me and I continued and eventually bought one. I used the Unwind on my knee and adrenals. I never had to have surgery, and now walk and run. I am so grateful for the laser. Thank you

- Sandra C.

I broke my back, squished two vertebrae when I was thrown from a horse when I was 14. I have suffered great stiffness recently (50 years later). The laser has helped me greatly release tension in my lower back and I feel as if I can walk with more freedom, flexibility and pain free—the stiffness is almost gone—now I'm dealing with emotional feelings that were stored in my back. I am looking forward to complete healing.

- Barbara G.

A patient who had two prior back surgeries still has intractable back pain. An implanted electric stimulator in the spinal canal gave her no relief. She had a morphine pump injected and still continued to use large amounts of pain medication. After 5 laser treatments she reduced her medication intake in half. Also prior to the laser treatments she was essentially home bound and following the laser Rx was able to go to the grocery store & do some shopping.

- Leonard K.

I have pain at lower back by twisting muscle. My friend did the cold laser about 20 minutes pain was gone. I fell from tree several feet high. I got the pain at my hip. I tried cold laser about 20 minutes twice. Pain was gone

- Masaji T.

One day my husband got a phlebitis (severe) condition. Swollen leg-fever-redness and a vein very congested and ready to explode. I used the laser and in three days was completely no pain. Great!

- Lucy M. PhD

Using the laser on unwind for one week brought my husband out of a coma. Treator Muscle and Ligament on the throat and he regained his ability to swallow in one day. Repeated each day for one week and his throat cells completely regenerated as confirmed by x-ray.

- Kathy F.

My dentist was about to go in for shoulder surgery within two weeks. He is a cosmetic dentist on Park Avenue in NYC after one treatment he felt some relief. Since he was my dentist and was having trouble holding the dental tools, I lent him my laser for one week between appointments. I told him to use it three times a day for about 45 minutes each time after the week was finished, he canceled his surgery.

- Joan C.

After spending five days at a touchy feely camp in rural CA, I expected to spend three pleasant days as a tourist in San Francisco. Almost immediately upon checking into my hotel, I knew that I was about to be desperately ill. I'm guessing that I shared a lot of close contact with a number of very sick people. I was in bed for three solid days with the Scalar Wave Laser, barely eating anything. I knew at the onset that this was going to be very serious. Had I not had the laser with me, I knew I would have been in the hospital. Instead, I was able to drive to Los Angeles to be at another five-day event. I continued to use the laser and loaned it to a person who had a migraine. In three hours she was on the brink of being pain-free. Another person had some back pain. In two hours, she found significant relief. I returned home as a healthy, fully functioning person.

- Jennifer L.

I was diagnosed with a hernia through an ultrasound. Luckily I had been introduced to the Scalar laser and had approx. 12 or 13 treatments on the area. The surgeon wanted to do a 2nd ultrasound to confirm the place of the hernia. This was two months later and it was inconclusive, they could not see the hernia opening. I continue to do treatments to completely heal the area.

- Patti L.

Six years ago, on August 16, 2003, I went to my doctor to get a routine checkup. The doctor proclaimed that I was "among the healthiest men he knew." That night I had a hemorrhagic stroke. With it went my engineering career, my ability to dance, water-ski, snow-ski, ability to do all the other things that require a functional right side of the body....like writing, eating, shaking hands, etc. Therapy followed with fair results, though lacking the results expected.

On Jan.1, 2006 a TIA imposed itself on me, affecting my left side with numbness in the left hand and foot. It also noticeably affected my speech. In reality, the TIA tore down much of the benefits achieved from previous therapies. However, I kept a positive attitude, hoping there is something, somewhere that could restore my capabilities.

On Oct. 25, 2009, through a good friend, Georgette, I received an invitation to a demonstration featuring a Scalar Wave Laser. I was told its successes in Europe, over the last 20 years, have been astounding. A charming professional, Cathy, aptly conducted the demo and afforded the attendees some actual hands-on-time.

By the end of the demo, I saw there would be help to eliminate my unyielding impairments! I was told this hand held device interacted with the body by rejuvenating and purifying the cell structure, preparing the untainted cells for new growth.

Hearing and seeing what this laser has done for others, was truly a triple "hallelujah" day for me! I reasoned that if I could possess one of these lasers, I would become a fully functional person again!

After attending a second demo session, I was offered the opportunity by Cathy, to use a Scalar Wave Laser, in my home, for a two-day period to test its effect on my stroke-related impairments. I was elated with this generous gesture. I had little knowledge about the 110 specific protocols in this laser, and had no instruction manual. None-the-less, I decided to make the most of this opportunity. I started with what I thought I knew, and in 14 hours, using only the "unwinding" protocol to do my testing, the Scalar Wave Laser made significant improvements in all my impairments as indicated below.

Test Results:

1. Release of stiff, locked neck - By applying the laser for 1.5 hours, to the base of the skull, on the right and left side of my neck, I was able to change my head rotation angel from a total 120 degrees to 190 degrees without pain.
2. Numbness in the face - with a treatment of 1.5 hours, the numbness was reduced from very noticeable to barely noticeable. Loss of numbness improved my speech.
3. Right Shoulder Mobility - before treatment, I could only raise my hand to the level of a couple inches above the top of my head, without pain. After treatment, I could raise my hand 18 inches above my head without pain. Treatment time was 1.5 hours.
4. Releasing "Catch" (jerking motion) in Right Knee. Applying the laser under and over the knee for 1 hour eliminated the "catch," smoothing my stride.
5. Right Ankle Stiffness - Placing the laser under my foot, served the body's chakra ending at the bottom of the foot. From that location it seemed likely, there should be help through the Chakra, to other body parts

served by the Chakra. Due to the proximity of the laser to the ankle, I reasoned that the ankle would be served with the laser's power. Within 1.0 hour, treatment the stiffness subsided.

6. Balance for walking - Balance is a brain function, application of the Laser for 2.0 hours, to the head (front, side, back) improved my balance remarkably. I was able to pick up my feet, placing them down smoothly, heel first, without stubbing my toe.
7. Numbness in right hand - Fingers of the right hand have remained tensed and rather inflexible. Laser application for 2.0 hours removed most of the stiffness and numbness (in the hand), allowing the finger joints to be flexed with greater ease.
8. Pain in left wrist - Because the left hand is used as the primary implement to do everything, it became painful, to a degree that I could hardly pick up a cup of coffee. Using the laser for 2.0 hours eliminated most of the pain.
9. Bladder control - Prior laser application for 1.5 hours, bathroom trips were four to six times a night. After application, nothing seemed to change until 4 or 5 days later. Then the bathroom trips diminished to one or two times, and has remained constant to date.
10. Kidney, Liver, Spleen, Thymus, and other Like Glands—received the remainder of the laser operation time, about 1.0 hour.

Observations, Recommendations, and Comments

With time, some of the impairments have regressed somewhat. Regression appeared in varying degrees, but never returning to pretest severity. All impairments held some level of improvement.

It is with complete confidence and sincerity; I make this statement: "The Quantum Scalar Wave Laser is the only device, currently used, that will be found capable of reducing to an unnoticeable level, every impairment that a stroke victim may incur." If properly used, with training and commitment, this laser will return a stroke victim to society as a completely functional individual.

It is my belief and suggestion that every rehab center own Quantum Scalar Wave Lasers as part of their patient's therapy. The use of the laser is so safe and simple that it could be patient applied, under the supervision of a (laser certified) physical therapist, who will set up the laser for maximum effectively.

Further, I recommend that Medicare and secondary insurance companies be contacted by Scalar Wave laser people about the history of rehabilitation successes around the world and establish a patient ownership process and price. If Medicare and the supplemental insurance can come together to provide a motorized-scooter or wheel-chair for a patient's convenience, to get around in their own house, why not give them a device that will allow them to **walk** around in their own house or anywhere else they want to **walk**? Would that not make more sense, that tying them to a scooter or wheelchair?

I learned that the liver and kidneys control the well being of all the organs in the body. While conducting tests I did not know that fact. I went with what I knew. I did not know enough to take advantage of the correct protocols programmed into the laser, yet I received great results. What a victory for me!! I see a rejuvenated fully functional person, in me, resulting from future applications of this laser.

- Frank K.

I chose these clients because measurable results were seen with one Laser session.

For the following clients, I initially used the Unwind setting on the Adrenals, Sacrum, Occipit, and the Quantum setting on the Thymus before addressing their individual issues. All initial and subsequent programs were run for four minutes.

Venous Ulcer—Lower Leg—Chronic for 22 years post blood clot in area

35-year-old male Real Estate Agent

Programs: One extra Sacral Unwind

Over Venous Ulcer: Scar, Regeneration, Lymph, Capillaries, and Cellular Regeneration

After 1 session the skin started to heal and thicken noticeably within two weeks.

Groin Injury—Nagging injury for 18 months

31-year-old male Professional Hockey Referee

Programs: One extra Sacral Unwind, One Quantum over Sacral

Over groin: Relieve, Muscle, Scar, Fascia, Ozone, Cellular Regeneration

After one session, I refereed hockey four days later with no discomfort. Refereed another hockey game the next day with no discomfort where upon he would have had pain and weakness in the affected leg.

Achilles Surgery Repair—two weeks post cast removal

49-year-old male Senior Racquetball Champion

Programs: Over Achilles: Relieve, Cellular Regeneration, Lymph, Scar, Capillaries, Ozone

After one session, the swelling at the surgical site went from a golf ball diameter to negligible in size. He could walk down a flight of stairs normally whereas before he had to walk down the stairs with a side step.

Fibromyalgia—Chronic

58-year-old female Day Care Provider

Programs: filtered thru Thymus: Relieve, Pleo, Liver, Kidneys, Lymph, Relaxation, Muscles, Well being, Ozone

After one session was able to sleep better, had more energy, less pain. This level of wellness continued for two weeks where upon we performed another similar session. After the second session, again she received and increased level of wellness in all areas, which she has continued to maintain eight weeks later.

Shoulder Blade area—pain with no pathology for about five years

39-year-old female office worker

Programs: One extra Occipital Unwind

Over shoulder blade area: Relieve, Muscle, Ozone, Scar, Cellular Regeneration, Quantum due to possible emotional connection.

After one session she had complete pain relief and could shoulder check when driving whereas before she had limited cervical movement.

As a second benefit, this client also had a congested chest (Unknown to me) due to eating cheese that day and being lactose intolerant. After the session she stated that the mucous had totally cleared out of her lungs for which she was very amazed and pleased!

Thumb—Crushed by 10-pound weight two days earlier

30-year-old female Personal Trainer

Programs: Directly over thumb: Relief, Lymph twice, Capillaries, Cell Regeneration, Ozone, and Muscles

After one session she found immediate pain relief. Being a personal trainer she knows her body well and felt that the area healed much quicker and she could return to working out much sooner.

A second benefit, as an asthmatic, she found after the session her lung volume had increased.

Ear pain during landing in a plane

52-year-old male golfer

The initial Unwind and Quantum programs **were not** used!

The only program that was used was Ears over the sore ear for four minutes, which completely took the pain away in about two minutes! Amazing!

- Anonymous

I find I have profound relaxation, which gives me relief from the Fibromyalgia symptoms of pain and stiffness.

- Mauri D.

My 4 yr old daughter wakes up in the middle of the night crying with growing pain in her legs. 10 seconds on unwind and she is asleep.

- Maria R.

A friend used laser several times for a couple days had terrific results, helped his feet and hands, he is a diabetic he ended up buying one. He is very happy and feeling much better.

- Cecile M.

My shoulders have become acutely painful. I used the laser by itself and/or UV probe by itself with very good relief of inflammation. I have done this several times since purchasing the laser and probe in Feb/10.

- Sharon K.

Had severe headache that I needed a chiropractic treatment. After using the probe headache was gone and I didn't need chiro.

- Margaret W.

One day I cut my finger. By the 3rd day it was throbbing from an infection. I was aware that Ozone acted as disinfectant so I plug in the Probe into the unit and held it on the cut for about 10 minutes. In about ½ hr the throbbing stopped and next day the cut was almost mended. By day 2 it was totally healed.

- P. W.

I have suffered with low back pain for at least ten years on and off. My doctor could only offer drugs or surgery, and neither seemed a workable solution because of the long-term harm to my health. Six months ago, I started using the Scalar Wave laser every day at the wellness center where I work. The pain is gone, but so is the stress. The “side effects” of the laser have been improved sleep, feeling of well-being and improved circulation, which sure beats the “side effects” of surgery and drugs offered by the MD’s.

- Joan M.

My mom had bleeding in her lungs. She was coughing blood for about 2 months. I used the laser on her once and she noticed a shift in the color of the blood, it became lighter. We weren’t able to do it again for a week or so but when we did another session it changed more. She bought her own in February. However by this time the coughing of blood was gone! She “loves” her laser.

- L. S.

I’ve had a lump on my arm the size of a quarter for approx. 2 years—just using the laser on it this weekend, it has gone down to the size of a dime.

- Lori B.

I went to a staff party for my work and my co-worker had a headache and in the car on the way I put the laser on unwind on the back of her neck. We arrived at the hotel and my co-workers headache was gone.

- Helen C.

My daughter has just gotten a belly button ring. She had been having redness and swelling at the site. We used the unwind protocol. Also we used the probe (red) on pleo, as well as rejuvenate to help the area with great results.

- Tracy M.

A client came to see me to get some relief on a knee injury. She was off work and wanted to avoid surgery. We did two sessions about one week apart. She had immediate relief. She returned to work after the 2nd session. She is now the owner of her own laser with a team. Also, I fell skating. When my knee hit the ice, I felt my femur bone push my hip right through and move my pelvis. My husband carried me into the chiropractor’s office and then into Emergency. I couldn’t put any weight on my leg at all. Using the laser enabled me to continue teaching and heal very quickly. I only used crutches for 2 weeks. I went dancing 3 weeks after my original injury. I saw my chiropractor 2 months later just to make sure everything was in alignment. NO PAIN!! In addition, I have bone disease in all four quadrants of my jaw. I had an ultrasound to show and diagnose the bone disease. The dentist told me I had two options: Surgery to scrape the disease from the bone OR lasers. No brainer. I already knew about the lasers (I am an EPMX practitioner). I went to the next laser gathering last spring and purchased my first laser. At first, every time I put the red probe in my ear and on my jaw or in my mouth, there was a constant pulsing feeling. Now, I no longer have a pulsing sensation when I am working on these areas. I want to get another exam just to see the improvement. On 12/11/2009 I used a Scalar Wave cold laser for the second time at a Stillpoint Seminar. I enjoyed the calm of the Unwind protocol and then asked about bone/joint studies for my often painful knuckles. A person sitting next to me let me use her laser on the arthritis setting as we listened to our speaker. I believe it was only for four minutes on each hand, but I saw with my naked eye an immediate decrease in the size of my swollen knuckles. Since December, I have purchased a Scalar Wave laser and use it approximately twice a week on Unwind and Arthritis. I have now have 100% range of motion and am pain free.

- Holly H.

I worked with a person last night that had a knee injury. He relaxed beautifully and his pain level was substantially reduced. His mobility was increased! Waiting to hear how he is today.

- Shirley C.

I had 4 tests at 2 Regina hospitals (March 4th and March 8/10) and was diagnosed with infiltrative carcinoma, an aggressive cancer in the left breast. There was a tumor of 7-10 cm in it. I put myself on an eating program from the book “The Gerson Therapy” by Charlotte Gerson and Morton Walker. Also detoxing with bio cleanse footbath; eating

various vitamins and using Scalar Wave laser on my body. I am steadily healing from this chronic condition. Renewed health is apparent in 2 ½ weeks of applying this program to my body.

- Helen N.

My personal experience with the laser was the relief of pain due to degeneration of a disk in my lower back. Initially, I felt pain and uncomfortable sensation. Today I am relatively pain-free. Thank you Scalar Wave Laser.

- Margaret G.

My experience is limited to demonstrations in small groups here in Charlotte and once in Columbia. I love unwinding to still point. I used the laser in Columbia on quantum setting on my shins. I frequently wake up at night because of cramps in my feet and shins. Since then, I have had foot cramps that wake me but no problems with the shins. This weekend, I'm using the laser on my feet!

- Vicki C.

Has a bad fall a few weeks ago and reinjured a weak knee. By that afternoon I could barely put any weight on that leg! Spent about six hours lasering the knee using any program that felt right. Significant improvement by the next day with full recovery within a week of an injury that reasonably should have taken 4-6 months to heal. Wow!

- Bonne B.

I was saying to my partner that I wished I had a "success" story for a testimonial. As we were heading home I noticed a swelling inside my lower lip, like the beginning of a cold sore. I lasered it all the way home and this morning it is gone!

- Marg P.

Both of my thumbs have been in pain for about two years. I put the laser on both for 15 minutes each hand and have had wonderful results. The joints are much better and the range of motion is very noticeable.

- Dianne T.

Last fall I slammed my finger in the front door. My nail was deeply dented and the finger was swollen, red and throbbing. That night I heard the instructor talk about the Laser. She told me to use the Quantum and the Blood settings (cellular). Within minutes, my finger stopped throbbing and the swelling decreased. Our Great Dane got her tail slammed in a door, as she jerked it out-it was bleeding, red and swollen-so I looked in my notes and applied the same technique- within 30 minutes to an hour she was relieved.

- Hope K.

In June 2009 my son broke his shoulder blade. He was riding his motorcycle when a car pulled in front of him, and he laid the bike down. I had gotten my laser and probes shortly before the accident, and we used it frequently. When he went back to get the shoulder blade checked, the doctor and his interns were amazed to find the bones had healed.

- Jan P.

Knee pain is relieved in 8 minutes-even with bone on bone.

- Michelle S.

My husband complained about his shoulder and arm pain. He was unable to raise his hand over his head. After using Unwind and Relieve for about 30-40 minutes, the pain was gone and he could move his shoulder and arm. He became a believer that day in the awesome power of the Scalar Wave Laser.

- Shirley R.

My experience with the Scalar Wave Laser has been absolutely amazing!! I was introduced to the laser by a friend of mine who, at my request, began using it on my clients. One of my clients is an exercise instructor and teaches classes where she does lunges. She injured her knee and had been diagnosed with a torn meniscus. After her session, she stood up and was so surprised that she no longer had any knee pain. She immediately started doing lunges and said "Oh my gosh! I can do my lunges." Many times the laser is not put on the site of pain but on the

organ whose meridian is affected. People are amazed they get relief when you put the laser somewhere other than where the pain is. We have had such wonderful results with the use of the laser it almost seems impossible.

- Debra S.

For years I have been suffering from chronic knee pain. In 4 minutes using the scalar wave laser and violet probe, my pain was gone.

- Bob S.

In late June of 2009, I suffered a severe sprain of my left ankle and was told to expect to spend the next six weeks wearing the heavy, chunky boot to support the ankle. Beginning the next day, I placed the laser on the ankle (over the top of the boot at work). In two days, I could walk short distances without the boot. In three weeks, I no longer needed the boot at all, even walking on uneven surfaces. There has never been any residual discomfort in the ankle and it is as strong as it ever was!

- Jeane G.

I came to my 1st demonstration of the laser with back pain neck pain and knee pain. After a few minutes of treatment, they were all gone. I had energy, a sense of balance and wellbeing!

- Jenny R.

As I left work one day, my right shoulder began hurting and by the time I arrived home, I could not open a door. I immediately started with Unwind protocol then used the hand unit and red probe on the shoulder area with quantum, pleo, relieve, and whatever my intuition told me to use. The next morning the pain was about 90% gone and my range of movement was restored within 24 hours.

- Kathy B.

My son cut his thumb quite badly across the top and very deep. We started lasering with Unwind/Quantum, Pleo and Relieve. I worked with him every other day for a week. The thumb has healed and become flexible again. The cold weather has some effect on it right now but that's to be expected. With continued use, it is getting better every day.

- Robert G.

Bought the laser because of pain. Mostly shoulder and neck pain, which would result in headaches and sometimes throbbing and numb arm. Since buying the laser I don't go to the massage therapist or chiropractor nearly as often. My shoulder pain is gone and I have a lot fewer headaches. Hopefully I just keep getting better!!

- Nadine F.

I love my laser. I have a lot of lung problems from coughing, which can eventually involve coughing up blood. I have used the laser on Unwind, Quantum and all the lung protocols over the last four weeks, and have had a bill of clean health at my last checkup with my specialist. I am happy and very excited about the laser.

- Gisele C.

About a month ago, I fell and injured my right arm/elbow. I dislocated my elbow and have a really black/blue bruise. My first reaction was to put ice on the area to help decrease the swelling. That hurt so I tried my laser. I put it in the area with the most swelling. In about four minutes, the pain started to subside. In ten minutes, the pain was completely gone. I programmed the laser next for Bruise and used it for almost eight minutes; the bruise disappeared! There was a very slight yellowing of the area. But the black and blue bruising was gone. The next morning when I tried to bend my arm, the muscle in the arm was relaxed, and the elbow slid back into place on its own. I am so thankful for my laser!

- Vertha P.

I've been plagued with chronic upper back pain and tailbone problems. These stemmed from several falls, one of which was a high school incident. Throughout my adult years, I've needed to get chiropractic treatments to release the vertebrae in my upper back. Since acquiring my laser and using it in the cranial and sacrum areas, I'm finding that the tension and stress release I've experienced when using the Sacrum protocol feel great! I also use the laser

set on Quantum and Neuro Muscular for shoulder to neck areas and around the shoulder blades. My head can turn easily from side to side with ease now. My laser has actually saved me trip to a specialist clinic far away.

Ann V.

My experience with the Scalar Wave Laser has been absolutely amazing!! I was introduced to the laser by a friend of mine who, at my request, began using it on my clients. One of my clients suffers with Parkinson's disease and has a fused lower back. With all the exaggerated movements due to the disease and the fusion, she has a lot of pain in the lower back. At her first session, she was moving so significantly she could not sit still and kept sliding off the chair. By the time we got halfway through the session, she had completely stopped shaking and moving. Her back pain was much better and she was able to pick up her feet when she walked instead of shuffling her feet. The pain in her back came back after several days but remained better after the 3rd session for several weeks. Just imagine how great she would feel if she had her own laser!!

- Debra S.

The very first day I received my laser, I happened to be visiting with a friend of mine who had broken his arm and sprained his wrist. He had his arm suspended and he had been taking medications for pain for over a month. He still had inflammation and the healing process was very slow. I tried a few settings on his arm & within about eight minutes, he felt such relief from the pain that he didn't need to take his medications for a few days. He now keeps begging me to use the laser for all sorts of problems.

- Meredith R.

I had surgery for a ruptured appendix in 2007, which left me with a thick scar. I used the laser on the scar and no longer have the thick band of scarring and the incision mark has faded considerably.

- Judy T.

Four minutes on each side of my lower stomach and menstrual cramps are gone!

- Maria R.

My metatarsal arch had "fallen" and was painful. I had a 10-minute treatments and although I didn't notice anything right away the next morning my foot was pain free for the first time in 2 weeks.

- Polly S.

My neighbor had such sharp pains in his shoulder that it would wake him up in the middle of the night. I used the laser and probe on him a few times, and he couldn't believe the difference. He no longer wakes up in pain and he is no longer on painkillers. Since he experienced such great success with his shoulder pain, he wanted to try the non-smoking protocol and is currently smoking 40% less than before we started. He is sold on these lasers!

- Bonnie P.

I had a sinus infection. My eyes were swollen; I had lumps under my eyes and beside my nose. I was not pretty. I started using the laser on the PLEO setting on the tip of my nose for about 20 min. I also used it on my forehead and under my eyes. The next day I was back to normal.

- Helen P.

I offered to loan the laser to a workshop attendee, who had been in a car accident several years ago and had little use of her right shoulder. I showed her how to turn it on and left her with it for the day. The next day, the mobility in her shoulder was GREATLY improved.

- Bonnie B.

Two weeks after I bought the laser I tore the meniscus in my knee and was in extreme pain and could not bend or put pressure on my knee. I used the laser on my knee every day on the Unwind protocol. I also used Ligament, Muscle, Relieve, Soothe, Endorphins, and the Spleen meridian. Within four days, my knee felt 85% better, and in one week, 90% better! After two weeks, the pain was 99% gone, and no longer required pain medication or surgery. I was amazed! Wow!

- Jane S.

My wife had her right eardrum “sucked out” in a medical procedure over 40 years ago leaving her deaf in her right ear. The first time I used the laser on her, I did the basic procedure of cleaning her adrenals. Last night she shot up in bed, and I thought nothing of it. This morning she tells me that last night she was lying on her good ear and was woken up by the sound of our dog cleaning her paws. She heard all of this with her “deaf” right ear. We checked her hearing again by covering her left ear while I went into another room and spoke to her in a normal tone of voice and she heard me with her right ear.

- Michael R.

A groin muscle injury, a result of a fall. Doctors didn't know what to do, as I did not respond to their treatment, so I was sent to physical therapy. I went home, did the Unwind protocol for 12 minutes, then used the Cellular and Muscle protocols. After one session it was gone. No pain and complete flexibility!

- Marcia S.

I have been going to doctor for a year and being treated for high white blood cells. We all thought I had leukemia. After six sessions with the laser I now have a normal thyroid and normal white blood cells.

- Jennifer G.

I was in a car accident in 2002 and experienced whiplash. Every muscle on the left side of my head from the ear through the shoulder was torn and damaged. Because of this accident, I developed chronic pain in my neck and shoulder. After using the laser, I no longer have pain even if I've been at the computer for an hour or two.

- Barb F.

I am an acupuncture physician and I use my laser with the red probe daily on my patients, family and myself. I have found it very useful for pain issues because I specialize in sports medicine. Acupuncture has been around for thousands of years but the Scalar Wave Laser has brought my acupuncture practice into the 21st century.

- Joan M.

One of my previous polio patients who is 85 years of age has a weak leg, which gives him ongoing problems. He exercises on his stair stepper daily, and the maximum amount of steps he was able to do were 15. After one laser session, he was able to increase his reps to 33. After another week of sessions he increased his reps to 55.

- Richard L.

During the 2010 winter storm in Regina, I pushed a car out of the snowdrift. I heard something pop in my back and was in severe pain. I used the laser continuously for about four days and suddenly, I realized my back was pain free. I've had no problems since.

- Barbara C.

I injured my lower back in May 2008, and as a result, back and muscle pain kept me from doing many day-to-day activities. I was advised by my doctor to take painkillers, and visited the chiropractor every two weeks with only minimal pain relief. In February of this year, a dear friend purchased a Scalar Wave laser and I used the basic Unwind protocol on me. I have been pain free ever since.

- Janet W.

I accidentally burned my right middle finger and also my ring finger tip. I immediately used an ice water bath for my fingers followed by more ice. I also turned on my Scalar Wave Laser to “Relieve” and kept repeating....but blisters began to form. After about one hour of this, the blisters all but disappeared. I didn't need any more first aid. I'm sure the QW Laser saved the situation.

- Rosalyn H.

I consider my experience with the laser a miraculous one. For decades I suffered with chronic neck and shoulder pain despite chiropractic, cranio-sacral therapy, reiki, reflexology, etc. I would get relief for a few hours after a treatment but it would always return like the weight of the world sat on my shoulders. With just one laser session the pain was gone and it never returned. I felt “lighter” and life was definitely good for the first time in years! My daughter

(age19) had a 10cm pancreatic tumor removed last year. She lost her spleen and a third of her pancreas. Nine months post-op she developed a debilitating pan syndrome. The physician's answer to this was narcotics. The laser's answer was relief, after just one treatment! As a nurse, trained in western medicine, this new awareness brings hope and relief to situations where medicine fails or complicates. Thank you for this wonderful tool!

- Alice J.

My neighbor's sister from Calgary fell and dislocated her shoulder and cracked a bone in her arm. She had to be "put under" to put the shoulder back in place. This happened on Thurs Mar. 25. She arrived in Swift Current the next day to attend the Women's World Curling. My neighbor asked me to give her sister a few laser treatments while in town. After the first session she flexed her fingers, opened and closed her hand and moved her whole arm up and down without a lot of pain! She was amazed as she was unable to do that since her injury. She felt less pressure and pain in the whole area and was totally thrilled with the result after just one treatment. I gave her a total of four before coming to Regina for this seminar. She can't stop talking about it and plans to attend the session in Calgary on April 9th. She has a doctor's appointment next week and can't wait to hear what he has to say re: physiotherapy and or rehab that she may have to undergo. She believes if she could continue with the laser she may not need treatment all.

- Bonnie P.

Last Wednesday I "tweaked" my hamstring playing softball. I promptly started using the laser when I got home. Within 24 hours I was 90% pain free and focused on playing 2 games next Wednesday. The laser lessened the sever pain and accelerated the healing...a great tool for rapid recovery!

- Brad Y.

Relief from lower back pain caused by degenerative discs. The nerve system setting (subroutine Organ Systems) is the preprogrammed setting that worked for me. I set the laser for 15 minutes and applied to one sore spot at a time.

- Frank J.

I was diagnosed with Fibroma next to tooth #14. The Fibroma had to be removed and sent to a lab for a biopsy. The fee I would have incurred would have been \$1,000.00. I also would have needed a periodontal "supragigival" costing and additional \$110.00. This entire procedure would have entailed approximately five hours and six visits to the dentist. When the doctor mentioned that he would "Laser" the Fibroma out, I thought I would give my laser a try. I used it on a periodontal setting and the Unwind setting during the course of two weeks prior to my next appointment. The Fibroma disappeared. When I cancelled my appointment, he was very concerned and sent me a letter relieving him of any obligations if I didn't have the problems attended to properly. When I went back three months later for my regular checkup, he saw that the Fibroma was gone, and the other problem was improved. I told him what I had done and showed him the laser. I guess he was impressed so I left him some literature.

- Ann F.

I decided to have my remaining lower teeth pulled as I only had a few teeth left. I am 82 years old and if I waited much longer, it would be harder on me. The day after I had them pulled, my tongue and throat were so sore I had a hard time talking because of bone fragments from the wisdom tooth left in my gum. The pieces were so sharp that when I tried to talk, they scraped my tongue. The wisdom tooth must have had an abscess in it. The infection caused the lymph gland under my jawbone to swell up and my throat to hurt. A friend said she had something she thought would take care of the problem so I met her and she had me hold the Scalar Wave laser on my jaw for a few minutes. Within just a few moments, the swelling went from walnut size to pea size. The dentist had told me that my system would absorb the bone fragments in a few months, so what happened next was a surprise! We came home about an hour later and I felt a piece of something hard in my mouth, so I went to a mirror only to see it was the larger bone fragment from the wisdom tooth. A little while later the OTHER bone fragment came out also. In a DAY the whole thing was no longer a problem, and the pain was gone! The dentist was extremely surprised at the incredibly fast improvement!

H.B.

I have mercury toxicity due to amalgam fillings. In detoxing my cystic duct my liver and gallbladder would get stopped up. My chiropractor used the laser to unwind my cystic duct and open up the gallbladder to produce the bile

necessary to carry the mercury. Adrenals and lack of sleep are problems with mercury. The laser is essential to my recovery.

- Zan R.

Listening to Paul this morning re-enforced my experience with an abscessed eye tooth, which was part of a bridge. Although I had discomfort, I really didn't have a lot of pain; however, I developed a pea-size spot beside my nose and above my eye tooth. The dentist suggested a root canal. At this same time, I heard about the laser and bought one, which I used for a number of weeks. The dentist convinced me to have the root canal even though my gut feeling was to not go through with it. The dentist cleaned out the root but couldn't do anything about the lump, as it wouldn't freeze. I regretted having the root canal, and continued using the laser until the lump finally disappeared.

- Phyllis K.

In Dec. 2008 I had an amalgam filling replaced with a composite. The tooth was extremely sensitive to temperature and began to throb. I took some strong painkillers, but mostly I used the Scalar Wave laser and it would alleviate some of the pain. My work colleagues were convinced I needed a root canal but I persisted with the laser. The pain became more intermittent and after six months, my tooth was no longer sensitive anymore. I am a dental therapist hygienist and very glad that I did not act on my friends' urging to have a root canal.

I have other Scalar Wave laser successes but the tooth was the most dramatic.

- Judy D.

I had the laser about a month, when I developed a major infection/abscess in the right lower jaw/teeth area. I was scheduled for a root canal and antibiotic regimen, but used the Scalar Wave laser on the outside of my mouth/cheek area directly over the infection. I used PLEO three times per day for a ½ hour. After three days the abscess was gone! NO surgery, meds or root canal! This was six months ago!

- Sally J.

I had amalgams replaced just before Christmas 2008. The trauma was too much and I wound up with a severely sensitive molar that was aching and ready to blow up. I kept using my laser and red probe and it subsided. This kept happening for about six months.

Everyone was sure I needed a root canal but I persisted with the laser. I still have my molar and all is well.

- Juay T.

I had a very painful infection in my gum. I used the laser on the area, and within 12 hours the pain was 90% decreased, and completely gone within a few days.

- Joy C.

A friend of mine had a crowned tooth that kept getting infected. I used the red probe on Pleo and Ozone and worked on it for about ½ hr. I then used focused on the organ that corresponded with my tooth, and used Unwind and Quantum. My friend has no problems with the tooth any longer.

- Connie A.

My daughter, Taylor, had a blockage on her right sinus in her nose which made it impossible to breath out of that nostril well. I worked on it for two weeks and the dentist took another x-ray and it was gone. The dentist was amazed. I held unwind over it with the main unit for 8 minutes, then I ran unity for 4 minutes every night for 2 weeks. She is breathing fine and the blockage is totally gone.

- Lisa T.P.

I was about to throw out a vase of 8 day old roses. They were sagging, unsightly shell of their original beauty. Instead, I decided to see what my new laser could do for the flowers. I used the laser and ran four 4-minute sessions with the Quantum setting. After 3 hours, the flowers were restored. The energy from that 16-minute session gave them enough life to last an extra 3 days before the leaves started falling off.

- Patrica R

Did a PH test of tap water and it was at 8.5 lasered it for 4 minutes PH was at 6.7.

- Helen C.

I have worked in the complimentary health field for many years, and have worked with many wonderful modalities. The second time I used the laser I noticed I went immediate into belly breathing. This fascinated me as all these years, I have never experienced something that got me into a relaxation mode so quickly. I have also had excellent results with sleep.

- Enid O.

On April 1, 2010 I received my first Quantum Scalar Laser treatment. The very next day two of my good friends, couldn't get over the changes they saw in me. They told me I was acting differently; moving more elegantly, holding my body straighter. I smiled knowingly and told them about the Laser treatment and how great I was feeling. I then started weekly treatments, and in June I rented one for a week, and by July 2nd I had my own. The biggest benefits for me was my body started to shrink, my eating habits improved and my wrinkles started to fade more and more. I would lie in bed and feel my legs getting longer and feeling thinner. I would look in the mirror and see my wrinkles fading and the shape of my face thinning. My clothes started to fall off my shoulders. I was shrinking before my very eyes. I actually ate about the same; I just noticed my choices were healthier and smaller in portion. I also have much more energy, stamina and passion in everything I do. I feel wonderful and "I just love my laser". The Protocols I used the most were unwinding, quantum, vital, coherence, unity, toxins rejuv, and liver.

- Gail P.

I worked on a client using essential oils and the laser. She had one hip replaced one year ago and 2nd hip two years ago. I used unwind protocol; Quantum and Pleo on tailbone; all the Meridians plus expand and miracles. In one week all her staple marks and scars were totally gone. Her skin was smooth.

- Anne R.

My daughter had to get 4 root canals just before her 2 year old birthday, because she had gull stones and kidney stones when she was 6 months old from medication they had give her in NICU when she was born at 28 weeks. Anyway, the medication they gave her had flavoring in it, which rotted her teeth out before they broke through the skin. A few days ago she was complaining something was wrong in her mouth. I took her to her dentist and I was told she has pockets of infection on top of the teeth. We decided to give the laser a go, before taking antibiotics. Anyway, it isn't completely healed yet, but it isn't bothering her one bit now. I have been using the violet probe on unwind every night for 8 minutes.

- Lisa T.P.

My first visit to a gathering was very de-stressing. I had neck and shoulder tension when I went in and was floating without tension when I left. I then stopped and had a free 10-minute massage at a health food store. The massage therapist confirmed to me the way I was feeling when she said, "I could not find any stressed muscles, you are completely balanced. I have never had a client like you."

- Jerry B.

I first encountered the Scalar Wave Laser at a friend's party, November 2009! I jumped at the opportunity to test it for about 80 minutes. I focused on the inflammation of my left hand's index finger's swollen joints. And to my amazement, the actual lump on the fore joint, diminished. I am NOW in the process of training and becoming a proud Quantum Laser owner. Thank you so much for this extraordinary tool!!!

- Sylvia L.

The biggest difference I noticed since using the laser is the feeling of peacefulness. I am a "go-go" person who never relaxed and always lived in a state of tension. Surprisingly, I still accomplished everything I wanted to do in a less tense way.

- Doreen W.

The physical benefits of using the scalar wave device have been dramatic. We have experienced a great reduction in stress and pain, and have relief, mind clarity and improved deep restful sleep. It feels as if the body is constantly saying "Yes! Give me more!" Curiously enough without fully understanding the "Stillpoint" state, my husband and I

felt as if time had slowed down and we were getting more done with less pressure! It is almost as if we are living in a new dimension of where we are supposed to be, but somehow got sidetracked along the way. Thank you Scalar Wave!!

- Selina M.

My husband snored so badly that we could hear him downstairs of our home. He started using the laser on Unwind and Quantum every night. After three nights, he no longer has a snoring problem. Today I experienced "TOTAL STILLPOINT." I never thought that I could "ever" achieve this state. Very Excited!

- Beverly M.

I had my gallbladder removed six months ago but still used the Gall Bladder setting. It brings emotional release. I could let the grief go!

- Angela P.

From the very first time using the laser I have not chewed or bitten my nails. They are growing for the first time in 10 years or so. My cuticles have not cracked since either, hence, no hangnails.

- Brenda B.

After a personal crisis I collapsed in August 2008 with adrenal exhaustion followed by sudden onset of menopause. With my endocrine system failing I worked with many good tools which kept me off pharmaceuticals. I continued on a down spiral into depression, extreme anxiety and agoraphobia. My sister visited in December 2008 and gave me 2 or 3 sessions with the Scalar Wave Laser. She reports that she saw me shift and in looking back I realize that this was the turning point in climbing up out of that black hole. I purchased my own laser in November 2009 following the Western Canadian launch and have been experiencing the benefits of daily unwinding and rebuilding to the point that now, In February 2009 I have enough energy and confidence to work at my part-time job and begin resurrecting my own business.

- Karen F.

As a "beginner" with scalar lasers, I attended my first seminar in Saskatoon, SK in January. Ratansi did a great informational session, which included his most recent work using laser therapy in his clinic in Coquitlam, B.C. By the first half of the session I was hooked! I was hooked on learning more about use of this "gadget" to possibly help me in my journey to better health and wellness. Having been diagnosed with systemic lupus erythemetosis about 10 years ago, losing my professional career, and salary, having to go on disability with all the attending daily challenges; I welcomed a chance to learn about an opportunity to have a better life. Dr. Ratansi described and showed very recent research results that were very impressive. During the course of the session, I had the opportunity to handle and use a laser and followed the "unwind" directions. A lady sitting next to me coached me a little on how to "get started." At break time, I asked Dr. Ratansi about a quick protocol for lupus, my condition. He gave me the directions, I followed them and over the course of the last $\frac{3}{4}$ hour of the presentation, I "fiddle diddled" with the laser, placing it on my spine, a lifelong problem area. Then I decided to try the next challenge, two fibroids on either side of the neck. Additionally I had been going to different sites that posed some problems, ankles (old fractures), tailbone (old fracture) and shoulder (aggravated). By the time I left for home after the presentation, I was quite relaxed and had a happy feeling. That night I slept "like a baby" for 7 hours (my usual sleep is 5 $\frac{1}{2}$ -6 hours); waking in the morning more refreshed than I have been in years. PLUS upon checking my fibroids, I found them to have shrunk by HALF-unbelievable!! By the way, my 37-year-old son decided to stop smoking. His colleagues suggested that he investigate and give laser therapy a try. He did get it and has had success with stopping smoking, something he had not been able to do on his own for over 15 yrs. That was the impetus for me to really consider scalar laser therapy for myself and possibly other family member. A close friend also encouraged me to find out about scalar lasers. Love the laser!!

- Ann V.

I work in a very toxic workplace. My first experience with the scalar wave laser was to do the unwinding and then the serotonin on my ears. It took care of my anxiety and quelled my thoughts - a whole new peace-filled happy place that I want to stay in!

- Anne S.

My name is Anna C. and I am 14 years old. When I was 5 years old, about, I fell straight on my nose. Now, as I am getting older, my nose has been growing crooked. After one treatment of "unwind" I felt something throughout my nose tense up and release. Now it is a full straight nose.

- Anna C.

I had a client who came to your event due to high stress (not sleeping, tense, headaches, stiff neck, and back pain). Unbeknownst to me, due to EMOTIONAL stress and "replaying her favorite movie, poor me". Thus attracting more negative "poor me" stuff. After unwinding her and unwinding her pain areas and using Quantum and Unity she had a batch of tears then positively glowed. Now she has yet to "retake" any sleeping aides, pain medication and she laughs (so her son says). I worked on a young man who stutters. I did the Unwind protocol and then really worked on his jaw and temples. I also focused on relaxing his occipital lobe. Wonderfully, his mother noticed his smooth speech and was awed. He still has the odd stutter but he is so pumped, he wants a laser! I worked on a man who had been off work for the last 3 weeks. He couldn't stand up or move his head as "nausea" "head spins" would set in. He had lost 30 pounds and was pale. In one session I unwound him. It took a few to get his breathing on the adrenals. Then I worked on his tailbone a lot and rest of "Unwind." We then focused on his ear using the violet probe. He is no longer dizzy. Instantly, by the end of session his ear ringing stopped. He is back to work and has a healthy pink glow.

- Julie T.

A strange reaction of my body. Increased pressure in my brain. Warm and soothing feeling throughout my body. Heightened sensitivity of smell. I had a great sleep of 5 ½ hours. Feeling great in the morning. Peace and calmness of the mind permeates me in all activities. Feel great. Woohooo!!

- Mariusa F.

My neighbor's son freaked on me saying he had a concussion. He said, "Don't talk to me! Don't touch me!" (I had patted him on his back.) I told him that he was welcome to come over to my place. I would try out the laser on him. He actually came over. I did the Unwind protocol and worked on his neck and head area. He totally relaxed. Fell asleep. When I woke him, his headache was gone! Talked to him the next day and he was still feeling great!

- Shirley C.

I came to Florida to be with my mother, which in so many ways is an extremely healing experience. During my visit my mother treated me with the Scalar Wave Laser and it really helped calm myself and it also helped me to balance myself. I am very grateful for the treatment and every day I looked forward to it. Thank you Scalar Wave Laser and Mama.

- A. R.

Thank you, Paul and Lilly for the QWL. My family has benefitted in so many ways. You already are using three of my testimonials. But today being a new day, I of course have many more to share. My son and I love yoga. We now take our QWL to class and unwind ourselves and the others in our class. The class now does yoga breathing so audible. The yoga teacher now owns her own laser! It really increases my physical abilities.

- Kristy

On Paul's advice, I have been using the laser frequently for the adrenals. I found that I am more easily relaxed in a situation and am allowing my body to heal. Thank you for the opportunity to have a tool for my family's health that is so portable and positive.

- Cathy D.

I brought my sister Friday night to the session. She did not know about or experienced Scalar before and when Paul said to start with Unwind she held it over her heart. She has been carrying a lot of heartache as a result of a crisis in the family. She put the laser on Unwind and within a short point she was totally in Stillpoint. My sister Cynthia totally felt the Unwind.

- Cheryl Z.

I attend the information seminar last night and was given the laser to try. This was my first time and was not sure what to expect. As the evening wore on I could feel myself relax to the point where I had to close my eyes and put my head down. I was totally relaxed. My sister was sitting beside and saw this. She asked me if I was relaxed. I thought "was she speaking to me? Can't she see I was having a nap?" Then I got up and had some coffee. Hoping that would wake me up... I never drink coffee! I left the room, went home and felt much anxiety leave my body. I had the best sleep ever. I got up this morning feeling well rested. It was a great experience.

- Cynthia Z.

I came last night to hear about your lasers. I used Unwind on my adrenals and temples. When I left I noticed that my eyesight seemed to have improved. I am going to purchase a machine.

- Jeannie D.

I came to hear about the Scalar Wave Lasers. I used it during the session and I have so much energy today. I am impressed with this machine after only using it once.

- Rob B.

As a lymphatic and colon therapist, I am using it in everybody's session. Doing the Unwind first begins the release for the vacuum cleaning (lymph) and exhaust (colon) systems of the body. During every colon hydrotherapy session, the laser is moved every four minutes to a different place on the large colon starting with the lower sigmoid. It has replaced my hand in massaging the colon with light! I have also placed oxygen oil and aromatherapy oils to drive them deeper into the tissue. Many clients have greatly benefitted from the laser including an 88 year old who has relief from irritable bowel to a 10-year-old boy constipated from birth, who now has feeling in his digestive tract and daily elimination. As a breast lymphatic therapist it is softening and melting the fibrotic lumps of my fibrocystic breast problems.

- Roz F.

After a few sessions with the Scalar Wave Laser, I'm feeling more relaxed and at ease. The situations in life are resolving without getting me upset. I'm acting, not reacting, occupied not pre-occupied. Also my sexual life has been enhanced tremendously.

- Awilda

I have experienced a variety of vehicles of energy healing. The first night at the conference I felt a definite shift in my energy towards the positive when I applied the laser to my skin. I could feel my quantum energy and felt completely relaxed which is a definite change for me.

- Rebecca H.

My patients are experiencing deeper states of relaxation. One fellow with prostate issues has an increased urine flow and says the feet neuropathy is 95% gone. For myself, lower leg pitting edema is gone. My facial skin has apparently thickened and jowls are more firm. Another patient has quite naturally reduced her use of cigarettes by more than half after only 3 treatments.

- Richard H.

I received my laser at the beginning of Oct. 2009. I had been using SCIO for therapy to great effect, but was drawn to the laser. I am at the beginnings of a heartbreaking divorce with depleted adrenals, and was suffering acute anxiety. Quite simply, the laser has saved my life. My body has been able to Unwind and give me the peace and self-confidence to make the very difficult decision to leave a destructive marriage and begin anew! Unwind 2 times per day and also benefit greatly from Unity, Wave, Rejuv, 5HtP, Stress Relief.

- Lisa S.

Our six-year-old son tends to be quite moody. He holds onto a lot of stress and needs to control everything. Doing the laser on him puts him into a calmer state and the energy changes.

- Kristy K.

Had a client who had blood pressure of 135 and after an hour of Unwinding she went home and her blood pressure was at 107. I was in a health food store and the girl who worked there was negative. The manager asked her to be lasered. I lasered her on the Heart Chakra, Pleo and Quantum. After 15 minutes she was smiling, relaxed and positive and said she felt great!

- Helen C.

After I came home with the Quantum Laser, of course my wife thought I was crazy spending a huge chunk of money on a laser system. We started basically with the Unwind protocol but mostly I let her play around with it daily. She noticed her eyes were a bit cloudy and yellow. She was also feeling quite run down. After a week of Unwind and Liver setting over the liver her eyes were completely cleared and the yellow disappeared. She was very impressed. Happy wife, Happy life!

- Alain W.

I have been using the laser for 4 months and friends have been remarking that I look slimmer. I weighed myself and I've lost 10 lbs. Not doing anything different except the laser.

- Maria R.

After I received and used my laser, I don't worry. I'm calmer, handle situations better, increased self-confidence and self-esteem. Do more activities "alone" now where before I was very nervous and afraid. Now I look at things as an adventure.

- Harriet B.

I have been a massage therapist for over 20 years. Since I added the Scalar Wave Laser to my practice (both as an extra "tool" or as a stand-alone therapy) I have received fabulous feedback from clients. Great results have been more consistent and without the wear and tear on my body!

- Lidia L.

I am thrilled to find a tool for Health Rejuvenation! I am a mother of nine children. All are married and have given me 30 grandchildren and eleven great-grandchildren. I made sure each home has a laser so they can learn how to help their children. I am simply fascinated with the health benefits of the laser. I made it my gift to them to have a laser in each home so they can learn and do sessions on themselves and their children. Here's the gem. Give a child a fish, he'll eat and die. Teach a child to fish and he'll live to grow old! Thank you for sharing this knowledge with me.

- Joyce T.

Attending last night's session, I applied the laser to my heart. I immediately began to Unwind, color came to my face and my eyes brightened. I relaxed into Stillpoint so quickly and easily. Thank you!

- Corinne J.

I used my friend's laser throughout the morning during Paul's presentation. I've noticed the stiffness in my neck/upper back has dissipated; I feel calmer. I had 3 hours sleep last night and don't feel tired (I expected I would be exhausted). Overall I feel centered and various aches and pains are gone. My level of alertness is much greater than I would normally be experiencing on such little sleep. My energy level is great now!! My vision is not blurry as it sometimes is. Great Stuff.

- Marcella G.

I am so excited and pleased to have finally found relief from daily stress. I overheard a conversation in a restaurant; a man was talking about his wonderful results from having a laser used on his tailbone. I felt compelled to ask him about his experience. This led me to a local lady who owned the laser and was willing to help me have my first experience. I purchased the laser yesterday and am happy to have this useful tool. It will be used daily, it works great! Thank you!

- Linda H.

I first had the Unwind done on me after a hectic day at work. While Sylvia was doing this, she told me about the laser facials she does. I have had 2 of them - I didn't know if I mentioned how de-stressed I look lately. The Unwind made me a believer and the facials solidified that belief. Today I bought my own.

- Cathy L.

After more than five years of very bad depression and taking five prescriptions (asthma). Now after 2 ½ weeks with my laser, using it twice a day, I feel totally different. Not grumpy anymore, upset or frustrated. I don't take things very personally against me, NOW, very new, feeling happy in a totally new mood, and of course new white blood cells and thyroid working normally since Dec. 29, 2009. Thanks so much for this incredible tool.

- Jennifer S.

During August & September, I was adding the finishing touches to my new office building by doing the insulation, painting and moving. I saw massage clients all day and worked on the building until 11pm each night. I used the quantum laser each night and it kept me "glued" together both emotionally and physically.

- Laurie & Bob B.

The violet probe is amazing—emotional pain was relieved quickly and the relief stayed.

- Michelle S.

My experience with the Scalar Wave laser has been absolutely amazing!! I was introduced to the laser by a friend of mine who, at my request, began using it on my clients. My son is 26 years old and very volatile and destructive. He has punched holes in walls, kicked in a 52" screen TV and was verbally abusive. I got him to have a laser session by telling him it would help his back pain. With him trying to get into the military he said he would try it. The first session resulted in my friend chasing the pain all over his back leading us to believe it was emotional and not physical. I didn't see him until the next day when I asked him how his back was. He said "For the first time in years, I woke up pain free." This lasted approximately 4 days. After his 2nd session a week later, I asked him how he was. He said, "Something weird happened about 11 o'clock last night." When I questioned him about what he meant, he said "I don't know. I just felt happy. Not depressed. I felt lighter!!" After four sessions approximately a week apart, my husband even noticed a difference. He was calmer, less swearing and instead of instigating confrontations, he would walk away. Don't get me wrong. He still has the occasional meltdown but they are fewer and far between. This is just one amazing result I have experienced from the laser. It not only works on the physical, but has wonderful affects on the emotional as well.

- Debra S.

I have been using the laser for about five months. I have had fungal moles dry up and fall off my skin. I have had tremendous movement from anger and into forgiveness using it on liver/gallbladder where I no longer have "attacks". I have experienced a heightened high sense perception that has helped me in my client's sessions. I have used special customized programs for periodontitis and avoided having to have gum tissue perio scaling done. I have used special customized program for lowering blood sugar and have helped modulate using diabetic prescription meds (in addition to basic unwind). All this in five months. I have not been able to regularly use it! Imagine if I increased my frequency of use! Also, people have told me I look younger but I think what they are seeing is that I have less strain of emotional holding on my face.

- Joy F.

After 30+ years of practicing Krka Yoga and multiple other processes, the integration of the Scalar Wave laser has been quite remarkable! On a deeper level, the speed and efficiency of the conscious shift is unlike any other process I have ever experienced!

- Cliff J.

My mother passed away last Friday. She was an extremely active, woman and it took us all by surprise that such a vital person could be so alive one day and gone the next. As would be expected, it was an extremely difficult time for my family and myself. I used the laser to calm us, relax, and allow emotion to pass thru us easily to ease our emotional pain. It's been three days since she was laid to rest, and here I am at this seminar, as I knew my mother would want me to remain active. There was a heaviness and sadness that enveloped my entire being. While the

laser helped, I still had this heaviness. I was given a violet probe to use while I was there and felt like the extreme heaviness had been lifted. I feel better able to cope with loss and can talk about it much more easily now. While I am still sad and raw from the loss, I am so grateful that I am here and could use the violet probe. Thank you Thank you Thank you!

- Michelle S.

The Scalar Wave Laser: How do I love it? Let me count the ways.... Many of us non-professionals affectionately call it, "Doctor-in-a-box." From the range of what it has accomplished in my own energy body system, this label would seem an appropriate nickname. But the more I use it, the more I am discovering that its applications are much deeper, broader, and expansive than just appearing to deal with the body's ills. Although my finance at the time, didn't support the wisdom of adding another monthly payment to my budget, I was willing to eat peanut butter sandwiches for a year, to be able to get a Laser. I have never regretted my decision. One of the miraculous personal experiences I've had with the laser, was in the dentist's office where I had stooped down to stow my purse in the exam room, and when I stood up, I hit my head on the heavy metal tray with sharp corners. The staff came running into the room to find me sitting on the floor protesting I was fine, but I wasn't. I was quickly getting a granddaddy of a headache and felt shaky and dizzy. They discovered I had a deep gash in my head, which was bleeding profusely. The dentist wanted to send me next door to a doctor for stitches, but I said, "No...I don't do doctors so much. I've got my Laser with me. Just put a piece of gauze on the wound and let me sit here a bit." So, reluctantly, they did that, and I held the Laser on the top of my head on different settings until they returned about 5 or 10 minutes later. The bleeding had absolutely stopped. The pain had disappeared, and did not bother me again from that time. No headache, only a slight tenderness at the wound site for a few days. They gave me a prescription for Vicodin, which I refused to fill. I cannot imagine life without my Laser! If I have an "owie," I hit it with some of my customized settings for pain, healing, and regeneration. If I awake feeling physically draggy, sluggish or depressed, I set the laser to the Serotonin, Endorphins, and Wellbeing settings on the occipital ridge, temple, nasal passage, and below ear areas (anywhere that openings in the skull occur) If my hip joint is bothering me, I have learned that it's probably my gallbladder meridian and I use that. If my back hurts, I do "governor" meridian and apply Laser to nerves, neuromuscular, muscles, and bone, around the affected area, in addition to continuing to work with the absolutely FOUNDATIONAL "Unwinding." (I actually do a daily run of a few minutes each on "Unwind, Quantum, and Pleo," on all five of the basic areas: L Adrenal, R Adrenal, Sacrum, Occipital Ridge, and Thymus (just Quantum and pleo on thymus). If I look in the mirror and don't like what Mother Nature is trying to do to my face over time, I run days of "facial" and feel happier about my appearance after that. I use "fat cells" and "muscles" on my belly, which wants to stand out. If I feel like my body is trying to "come down with something" I have so far very successfully headed that off with Immune System" and "Detox" and simply amping-up Laser use for that period in general. This is only a thimble in an ocean of what I use my Laser for. I know I have only BEGUN to discover what all this Laser can help accomplish in achieving wellness, wholeness, balance, and over all STILLPOINT, in my energetic system; and I am looking forward to years of continued use with greater understanding, as new discoveries about its efficacy and capacities are made! It is perhaps the most useful tool I have found to help me stay radiant, healthy, and youthful in a world, which has become dependent on "Major Medical" and "Big Pharmacy" In the words of another well-known Guru, "The kingdom of heaven is WITHIN you."

Sydney C.

Many things have changed for me using your great Scalar Wave Laser! Two years of dealing with painful bleeding and sensitive gums I had tried a lot of alternative things including my Quantum touch group tag teaming me. I used the red probe after getting my own laser. The next day it was really bad. Then the next day it started improving and feeling good. My mom is so much better with a lot of issues including walking. But the most precious thing is the change I feel every second, every breath. A real calmness has come over me. THE FOG IS GONE! MY FOCUS IS BETTER. And I'm able to accomplish so much more. A real sense of direction. And I have that safe feeling like the days when I was Daddy's little girl.

- Carol H.

I am very happy to have been introduced to the Scalar Wave Laser. This was the most awesome program that I have been introduced to. I love how I feel when I use the laser, and love the energy and a sense of wellness I experience when using it. Thanks a million.

- Jeanette F.

I purchased the Scalar Wave Laser after using a friend's laser to avoid a root canal using the red and infra red probes. I received my laser the last week in September 2009. I had severe vertigo at the time, and the doctor diagnosed an ear infection and gave me a prescription for antibiotics. I used the Pleo setting with the red probe for 20 minutes in the navel. After that, I took a 20-minute nap, and woke up symptom free!! I continue to use the laser to unwind.

- Jeri H.

Like many alternative practitioners, I have gone through several cycles of attracting groups of clients with similar concerns. Recently, a friend brought her five-year-old grandson to me, looking for anything natural that could help. He behaved more like a two year old than a five year old. He was very loud and restless, constantly moving in jerky rapid movements with almost no fine motor control, and only about six words in his vocabulary. After only three sessions with the laser, I received an excited phone call from his mother that he sat at a table with paper and crayons. He drew a house and said "house." Both his mother and grandmother were jubilant!

Needless to say—so was I!

- Elaine H.

I am a pretty big skeptic, I have spent literally 100's of thousands of dollars on different treatments, processes, courses, workshops, healing, praying, traveling, talking....searching for relief with mental suffering. I came last minute with a friend, who raves about the laser. I am so impressed with Paul and who really walks the talk. I am looking forwards to enjoying more of the benefits of the laser. It's an honor to learn with his likeness.

Thanks and keep up the great work!

Lori B.

Prior to having the Scalar Wave Laser, I usually spent every winter with a cold, sore throat and earache. The first winter after using the Scalar Wave Laser every day this was no longer the case. However, mid winter I awoke early one morning with an earache, stuffy head, and major sore throat. I immediately reached for my laser and probes. I used the red probe on Pleo in and behind my ears, down both sides of my throat, and up my nose. Within about fifteen minutes, all pain and stiffness was gone, and I was able to start my day.

- Elaine H.

Saved my life. After a very stressful ten months looking after a dying husband from lung cancer, my adrenal glands were very stressed. For years, I have had a severe back pain from a fall on my tailbone. After this injury I was unable to walk for a number of weeks. I crawled like a baby until the inflammation left. This happened 20 years ago. After doing the basic Unwind, Quantum, and Pleo for six months, I was without pain and now can walk and do yoga again. No pain, more energy. Life is now great. Thank you for a great TOOL.

- Jeanette S.

A friend of mine has had severe knee pain for about a year. Physio and several other modalities have had no results. She and I travelled together this winter so I took my laser along and showed her how to use it. She worked with it for about 15-20 minutes each day. By day three she was sleeping through the night and no longer limping. By the end of the week, the pain was completely gone.

- Bonnie B.

After having used the laser just a few times tonight, I can certainly feel the very calming effects. This is the something I've searched for many years with PTSD. It does work for me and if it works for me I know it will work for everyone. I also used on my lower back pain and shoulder pain. Guess what? No pain this morning. I look forward to years of use with your laser.

- Phil H.

We started using the laser four weeks ago in our hair salon doing "facials." I was picked to be the model, 55 years of age and a heavy smoker for many years (quit four years ago). I had plenty of cell tissue damage. After my 2nd facial, a few people noticed a change. But after my 3rd session everyone noticed, and by my 4th session, people were

saying, "I want what you have!!" And the rest is history! My experience from all this is that I am a much more calm and happy person. I feel a sense of inner peace.

- **Bev M.**

No more hot flashes!!

- **Polly S.**

I use the Scalar Wave Laser every night before going to sleep. I like to read before sleeping, so I do the Unwind for 20 minutes following the basic protocol. When I am ready to go to sleep, I use the sleep protocol and set it for 20 minutes and then turn the light off. I put it over my temple and I am asleep before the 20 minutes is over. What I observe is a very sound sleep for the next 4-5 hours during which time I dream a lot. The quality of the dreams is much different. They are more intense and more real. For myself, the more I dream, the more rested I feel hence the laser allows me to feel more rested when I get up in the morning.

- **Guy L.**

Three days ago, I had my first treatment at my sister's house. I came to visit and it's been an incredible experience. The first night I slept like a baby. I was in such a deep sleep, when I awoke I couldn't believe it.

- **Marisol L.**

It's always taken me a long time to fall asleep. Now I Unwind before I go to bed, and I fall asleep before finishing the Unwind protocol.

- **Barbara L.**

After Friday evening's session with the laser, I experienced the best night's sleep in a very long time.

- **Lorraine G.**

I have always been a poor sleeper, but after using the laser on Unwind last Friday night I slept like a baby for the first time in a long time. I plan on using the laser for correcting my hiatus hernia and an old whiplash from 30 years ago.

- **Jeanette F.**

The treatment was fantastic. Unwinding was such a treat and the talk was inspiring! I will sleep well tonight

- **Dami E.**

After five nightly sessions, I have been getting best sleep in a VERY LONG time. Not only that, but I have more energy in the morning. I thoroughly enjoyed the weekend.

- **Lorraine G.**

I have trouble sleeping periodically. I find if I put the Scalar Wave laser on for a 12-minute setting and put it on my thymus I typically fall asleep before the 12 minutes are up. It works like a charm.

- **Enid O.**

I had my session yesterday, and had a good night's sleep. There was no numbing in my legs and arms and I didn't snore. (my husband was very impressed). I've gotten up early and no anxiety.

- **Bozene F.**

Since using my laser, I have experienced very deep sleeps. A long time coming. Thank you from the bottom of my heart.

- **Devona A.**

I attended your seminar last evening. I used your laser for about 30-45 minutes on my knee. Last night I slept better than I have slept in five months.

- **Leonard E.**

I have been rear ended in five different car accidents, and the last one was at 80km and my neck still hurts. I usually have trouble sleeping because it gets sore at night. I went to a seminar in Regina and used the laser and my neck, started feeling better and was able to get a good nights sleep.

- Donna A.

My initial laser application last night to release my adrenals/sympathetics resulted in a very relaxing sleep and no lower back pain.

- Michael R.

I just purchased my Scalar Wave Laser!

Just yesterday when I came to attend the Stillpoint Seminar, I was a little skeptical about the laser. At the seminar I was given a chance to use it on myself. Nothing happened right away. But I slept all night, and when I woke up, I felt no pain. My friends, who have the laser, say that owning the laser is like having a doctor in their home. I believe these words now.

- B.D.

After using the Unwind program in the evening for a week, I slept seven hours without interruption for the first time in YEARS!

- Margaret W.

Our 11-year-old male German Shepherd suffers from hip dysplasia. Programs used over Thymus: Relief, Muscles, Bones, Cell Regeneration, Scar, Ozone.

After the session, the dog could run up the stairs whereas before he couldn't. As well, he could now jump into the back of the owner's truck whereas before he would just look at the hatch as if to say: "Please don't make me jump up there!" One week later the positive laser results continued.

- Debb B.

When I purchased this horse off the track, the trainer told me that the lumps were a result of an injury that never healed properly. My vet diagnosed the lumps as a calcified hematoma. I feel it is a combination of saddle trauma and an injury that broke the skin many years ago. I rescued this gelding from the racetrack, he was still racing at 9.5 years old, which is very old to keep putting all of the pressure of racing on a horse's joints. Many racehorses break down at 3 years old. The first time I used the laser on Optimal, he liked the light. I started off using Quantum for 4 minutes. I gradually increased the light to the present protocol. I have noticed that the lumps are getting smaller, gradually. I have used the laser on Optimal 5 times. When I used the laser on him last week, he was actually leaning towards the light. Animals are very intuitive. It is important to watch the horse's body language. If Optimal is not ready for the light, and begins moving away, I stop. My goal is to help this wonderful horse enjoy being ridden under saddle. If something hurts, it is not a pleasure. The riding experience must be fun for the horse and the rider. The lumps are slowly getting smaller and less sensitive.

Protocol used: Quantum 4 min / Unwind 4 min / Unwind 4 min / Relieve 4 min

- Reza S.

I have worked on both of my dogs with the laser. Coco is my girl dog. She is 10 years old and has struggled with immune system issues after having a terrible reaction to a rabies shot. Her eyes were always getting infected and she was always squinting. She had to stay in the collar thing for 6 weeks at a time. I took her to an eye specialist who told me she would have to be on medication for the rest of her life. We changed some thing in her diet and it helped. She also had to have several teeth removed. A few weeks after the teeth removal, I got the laser. I began running the unwind program for 3 minutes on her belly, then quantum for 4 minutes with the main unit. After two weeks of working on her everyday, she looks great. She is taking no medication. Her eyes are perfect.

I have had the laser since February and I began working on her immediately. So, for approximately 6 months now, she has been in perfect condition. She has energy and runs around like a puppy. Her eyes are perfect now.

- Lisa T.P.

My 9-year-old Golden got a massive uterine infection and was near death. The vet said even with surgery there was a good chance she wouldn't survive as the infection was through her body. Before surgery, I used anti-inflammatory

oils and unwind & pleo, pleo, pleo, etc. until it was time for surgery. She wasn't doing very well and he wanted to send her to 24-hour emergency clinic but I talked to him. I would laser her, so he sent me home with her. I used pleo, detox, rejuv, vital, cohere and blood and anti-inflammatory oils all night and at 4am she turned the corner. We were later on going back to the vets and they called to see if she had died, as most dogs with that amount of [infection] don't survive. They (vet's office) couldn't believe this was the same dog. She was running around happy, wagging tail, eyes were clear. This was 7 months ago, and everyone thinks she's a 2 or 3-year-old golden retriever so not only has she recovered, but she's better than before she got sick.

- Anne R.

I worked on my dog - he was in a very scary state - we came home to find him lying on the ground not moving, dry nose, vomit all around his face (very smelly), growling at my son - I immediately put the pleo on his tail for two cycles - then began to Unwind him and Quantum him - he immediately started to improve, get up, walk, drink and his been great ever since.

- Julia T.

Our dog, Ziggy, is a white small terrier. He was bitten by a large mastiff dog. His life was in danger until I chased the large dog away. That dog killed our cat. The laser helped the bite on Ziggy's thigh heal beautifully. About 2-3 weeks later Ziggy changed from a cheerful happy dog to a scared, worried frightened dog. For 2 or 3 days my wife and I wondered what had happened. I decided to use the laser on Ziggy. He shook with fear at the start of the session with much encouragement and coaxing Ziggy sat in my lap and received his first session. At the end of it he was relaxed and peaceful. He went to sleep after the session. Next day we had our Ziggy back, happy cheerful and full of piss and vinegar.

- Dan B.

I have had the laser since Aug. 2009. I am an energy healer and I am using the laser with my clients. A simple and very effective protocol I use for constipation with the animal clients is full unwinding plus the frequencies of constipation. These not only solve the constipation but heal the GI system and relax the animal. I have had many other successes with the laser as well.

- Marilyn M.

I have a dog that had warts in his mouth. I used the red probe twice and all the warts are gone and have not returned.

- Elaine A.

Maya is a 10-month-old Jack-a-Poo doggie. She does NOT miss any experiences with the laser. As soon as the laser is turned on, Maya hears the "Beep" and jumps on the massage table. She curls up on the inside top portion of the legs and snuggles in for the ride. She never moves unless the laser moves or the person moves. She is now a dog who comes to the beep!

- Meg R.

Our wintertime visitor, a beautiful orange tabby tomcat, got caught in the front of a moving vehicle tire. The tire stopped turning with the cat skidding ahead for tire of over 20 feet on snowy driveway. Cat could still walk with hindquarters unstable.

- Lawrence B.

I used the laser on a 7-month-old calf for 3-4 weeks ½-1 hour a day as it was paralyzed and could not get up. He could only move his head. But now he is fit and well and running with the other cattle.

- Bryn O.

My cat was diagnosed with a pinched nerve in back. She could not urinate and had trouble jumping or walking. Just not herself — I used the laser on her for a few days she was herself in no time.

- Mauri D.

About a week ago, my Dalmatian did not eat breakfast, which is very unusual. She started being very lethargic, barely moved all day and didn't go outside. The next day I took her to the vet. He took blood samples and her temperature. Other than an elevated temp, he couldn't find anything else wrong. She didn't eat or drink all the rest of the day. I finally got the call from the vet at 8:00pm saying she tested positive for Lyme disease. I immediately got the laser did an Unwind, Pleo and Ozone protocols on her. She got right up and went outside came back in and ate. She was 75% better the following morning, and after another session, she's pretty much back to normal.

- Jim L.

My horse received a severe eye injury, and it was diagnosed as a deep tear to her cornea. Since Cheyenne, is 44 years old, the vet said it would take months to heal...if it was going to heal at all. I took a picture of her eye and started working on her daily, long distance, using the laser on her picture. I put her eye drop medication on the laser to charge it with various frequencies. After two weeks, the vet confirmed that her eye injury was completely healed!

- Susan K.

I have had amazing results with the Scalar Wave laser, with clients as well as my dog. My dog, Cody is part Burmese mountain dog and part cocker spaniel hence the floppy ears. He has issues with his ears and constantly scratches and inflames them. I put the laser on his ear and he actually leaned into the laser. When I put it on the other side he did the same. He also had done something to his right rear leg and wouldn't get up, yelping when he did. I put the laser on his hip for two 4-minute sessions on Quantum and he was FINE after that. Love my laser!

Debra S.

As a traditional naturopathic doctor, I have complete confidence using my Scalar Wave laser on not only my clients and family, but my pets as well. When I noticed that my 4 year old English Cocker was refusing to go outdoors during the day, and that her eyelids were fluttering in an uncharacteristic manner, I took her to our veterinarian. He diagnosed anterior uveitis, which is an inflammatory condition of the eye causing extreme light sensitivity. There are a number of causes for this condition, but after \$600 worth of blood testing, we still did not have an answer. By process of elimination, the best thought was that an immune dysfunction had created the iris inflammation. The initial non-steroidal drops from the Vet helped with her pain, but she still feared the sunlight. I immediately started using Quantum on her thymus gland to regulate the immune dysfunction. Animals are quick to respond, and twice daily at 4 minutes per session seemed sufficient. 'Winnie' enjoyed her laser time immensely. Our follow-up trip to the veterinarian at the end of one week showed all inflammation had subsided and her eyes looked completely normal. The veterinarian said he did not expect such a quick response. I feel confident that our laser therapy was the right protocol to get to the bottom of causation rather than just temporarily relieving inflammation. 'Winnie' now goes out of doors into the sunlight with enjoyment.

- Gael R. ND

A gardener had almost cut his hand off at the forearm with a chainsaw. The nerves and ligaments had been severed. After seven months, the outer area was healed, but there was no feeling in the pinky and very little strength in other fingers or hand. After using the laser on the scar for 1-2 months, the feeling came back in the pinky. After 15-20 minutes, the hand had more movement, feeling and strength. What an amazing technology.

- Jennifer W.

I have had TMJ for about 30 years and received many treatments for it over the years, including Orthodontics, dental work, physical therapy, Chiropractic, energy work and surgery. When my friend shared the laser with me, I wanted to work on my TMJ. I used the probes on the SCM muscles. I immediately felt results from "Unwind" and the next morning when I woke up, my jaw felt much better. I got another treatment the next day. After that treatment it seemed that the tooth that had died and was awaiting surgery, felt different. I cancelled the surgery and am going to begin working to regenerate and heal it. I was encouraged to learn that there have been many successes with saving teeth.

- Denise N.

I had a patient that had had two knee replacements one year ago. It caused her to have a lot pain in her ankles, and wasn't able to do normal day-to-day activities because she had so much pain. After about two weeks of laser therapy, she had her life back. She is now out shopping, cleaning her house without the pain she previously had.

Now her husband has to tell her to sit down and rest. My family had the stomach virus, and as soon as it started, I started using the laser on "Pleo" setting. What was taking everyone else 2-3 days to get over, we recovered from it in about 12 hours. I have a patient that was told by her doctor she needed two knee replacements. She didn't want to take that route, and decided to do laser treatments instead, and is very pleased with what it has done for her thus far. Her pain is minimal now, and we only do one laser treatment per week. I had a patient with endometriosis, which resulted in extremely painful periods. After only three treatments, her periods were much better with less painful. After using the laser on my son for about 3-4 months, he has had an amazing shift. He is more relaxed and much happier. After only two treatments on a patient with a low back injury, the patient is ready to purchase one for herself. Two weeks ago I treated a woman that has been in pain for six months. She has a bulging disc and has been in physical therapy for months with no relief. After only two weeks of treatment with the Quantumwave Laser, her level of pain has significantly decreased. Recently I had a 13 year-old basketball player that had a badly sprained ankle. We used "Unwind", "Relieve" and "Pleo", five days later he played five basketball games with no pain. He had complete healing.

- Cheryl G.

I've used the laser with patients for eight years and I have searched for lasers that are user friendly. The Quantumwave Laser is the easiest and most effective laser I have. It is affordable, compact and promotes healing.

- Carl M.

Autistic Child used regular device, then violet probe and parent said "child hasn't been this calm in five years."

- Judie R.

I use the infrared probe on "Soothe", "Relieve" and "Quantum" to eliminate the pain of my plantar fasciitis.

- Catherine L.

13 years ago, a dental professional diagnosed me with TMJ Syndrome. The pain in my jaw was chronic and intense. My jaw would lock up constantly, and there was no relief. After treatments using the Quantumwave Laser, I had my jaw examined again, and the dental professional confirmed that my jaw is now completely symmetrical and shows no sign of TMJ Syndrome. I am now completely pain free, and the condition has not returned at all. Thank you Quantumwave!

- Yachay

I've used the laser since Friday night (this weekend) and I noticed a tremendous difference in my body, energy and breath. I have more energy and my body is experiencing more peace and relaxation. I have cleared my sinuses and increased my ability to breathe (I have had asthma since age 9) I also noticed I'm at peace more with driving. I drove two hours last night and I was at ease while driving and not reacting. This was a tremendous change for me and took me to a deeper level. Thank you!

- Mira V.

Because of several abdominal surgeries over the last few years, my lymphatic system is very stuck. Using the laser has helped not only my lymph system, but has made an unbelievable difference in my whole body.

- Kathie B.

I have Carpel Tunnel in both arms. I have tried injections, acupuncture, accu pressure with only short-term relief not wanting to do surgery. I tried the laser and now am able to work with feeling in my hands again. I had fallen and landed on both knees. After two sessions, I was able to get to sleep and go to work the next day pain free

- KC J.

I have adapted the Quantumwave Scalar Laser "Unwind" protocol for use with horses and dogs. After seeing the positive effects on people, I came up with a protocol for horses. The owner and I were astounded at how much release there was. There were visible changes in posture, breathing and demeanor.

- Carl M.

Worked on 16 year old car accident victim and paralyzed hand opened.

- Judie R.

The laser has helped pain and “bulginess” of Baher’s Cysts behind my knees. It has also helped relieve pain in my wrist and thumb.

- Karla M.

I had abdominal surgery in February 2009. Soon after, I purchased a Quantumwave Laser and used it over the scars for several months on “Unwind.” I believe the use of the laser prevented the scarring that usually follows the surgery I had.

- Krista H.

My daughter had a sharp pain in her lower back whenever she bent down suddenly or curled up into a fetal position. This went on for six months. We got a laser, and she used the “Unwind” Protocol. The pain is totally gone now.

- Karen G.

I had a problem with a tooth, which prevented me from chewing or putting pressure on it. I used the laser on the “Bone” setting and after three times on eight-minute sessions the tooth was 80% better. I can now chew on that side of my mouth!

- Jennifer W.

The wife of my good friend had daily migraine headaches. Each headache would last for 12-13 hours, and nothing she tried brought relief. She used the Quantumwave Laser on “Unwind” every day. Then she used the “Relieve” protocol just as the migraine began, and it cleared within 13 minutes. It did not return that day or the next – with just one treatment.

- Burt G.

I have a tooth that developed a big cavity and great pain. I refuse to get a root canal and have decided to have the tooth pulled. It is a bridge tooth so it will be costly. To buy time, I had a pulpectomy. Shortly after the tooth “blew out” I felt pain in my mandible. I was concerned as infection in a bone is serious business. I used the laser on my jaw and the pain went away.

- Iris. P.

I had a female Yorkie that had a large litter of puppies (a total of nine, which is not normal for a 7-1/2 lb. dog) I was supplementing her with calcium so she wouldn’t get milk fever, but she got it anyway and she couldn’t walk. It takes calcium out of the soft tissues first and it makes them like a board (their muscles freeze up). I put the laser on her and put calcium down her and it unlocked her muscles!

- Penny T.

Last night was the first time I had ever used the laser. I used the Violet probe on my lungs and third eye. I have had asthma and congestion/sinus problems for years. The laser totally cleared the sinus problem and I could take full breaths all through my lungs, lower lobes and upper/middle areas. This remained that way all night long.

- Mira V.

I found the Scalar Laser very helpful in easing muscle strain after working out. The laser seems to magically normalize the cells so that all the pain and tension just disappears.

- Will L.

I am a motivational speaker and success coach. I bought the laser to help with my debilitating allergies. Within 24 hours, I noticed a dramatic shift in my health. I usually have a pile of Kleenex next to me, and a rash throughout my body. I recently moved from San Diego to Denver and it’s a lot drier here., which also causes the rash. After using the laser I saw the rash diminish and my allergies were dramatically reduced. I also noticed I’ve been manifesting like crazy.... Opportunities are showing up everywhere in my life and business. I am grateful to my friend for sharing the laser with me.

- Yasmine B

I'm a wellness practitioner at a wellness center and one of the treatments I use is a technique that helps patients balance toxic emotions that get trapped in the cells. I have been using the Quantumwave Laser in conjunction with this therapy for the past eight months and have noticed a much deeper, more profound shift in the energy of my patients. I've had patients come up to me in the hallway of our center and say "my life has completely changed" they say that they are processing through life from a much quiet place! They say they are much more responsive and not so reactive. To me, there's no better feedback than the enthusiastic expression of relief from life-long challenges that patients freely share with me.

- L.

I had a skiing accident over 35 years ago and broke my tailbone. (the chairlift hit my tailbone a fairly severe impact) I've had a lot of work done on the tailbone since then; chiropractic, energy work, acupuncture, etc... and I thought the injury trauma had been released completely. Within the first week of using my laser every day, on the "Unwind" protocol, I felt a huge shock. The shock of the impact literally left my nervous system. I immediately knew the source of that shock. The memory surfaced as it had just happened. It was absolutely amazing and phenomenal to feel that shock dissipate and leave. Thank you.

Becky H.

I used my Laser on my lungs when I started coughing up some blood. Within a few sessions, the blood and the coughing stopped. I love my laser!

- M. Finucan

I have had knee pain for a couple of years. After using the laser for a short time, my knee pain and discomfort have gone.

- T. Ross

I used the laser on a 64-year-old person who had had Hepatitis C for over ten years. His liver enzymes and ammonia levels were elevated to critical levels. And his platelet count was very low. I used the laser on Ozone, Pleo, Liver and Detox for nine days. Then the patient went back to his Doctor to be retested. His test results indicated that his blood values were in the normal ranges. And his liver panels had not been that good since he had been diagnosed ten years ago! Since all liver enzymes and ammonia levels were within the normal ranges, his Doctor recommended he return in three months for additional testing. I was astounded by the objective results in the blood values!

- C. Marble

I purchase my laser in Boca Raton in September. My Shit-Tzu accompanied me to that event, and was very miserable due to a chronic ear infection. I lasered him, and not only did this take care of his ear infection, but totally took care of his anxiety as well! Thank you Paul and Lillie for this amazing device!

- M. May

I have an old back injury from a car accident that flares up when I over exert myself. My good friend Charles worked on me with the laser for several days. Since I do a lot of physical work and heavy lifting, I am usually sore after too much exertion. Since my laser sessions, I am not feeling that usual soreness...WONDERFUL!

- K. Cavalier

Last night I had my first laser treatment. My sleep that night was much better than I have had in a LONG time!

- P. Van Essen

Getting daily laser treatments for 2 weeks allowed me to have the energy to go to an important trip to New York for 10 days. Since then, I have become a laser owner, and do laser sessions on myself several times each day.

- J. Gott

Doing the unwind protocol daily has helped me become more aware of my emotions.

- C. Dixon

I have suffered with Gastro paresis for three years as well as debilitating fatigue. After 7 laser treatments, I have been able to eat most anything I want, AND I have gained 12 pounds after a 50 pound weight loss! I used to spend half of every day in bed and now I am out of bed every day. And there has also been a big improvement in the frequency of my migraine headaches.

- D. Jarvis

I go to sleep with my laser doing the Unwind protocol and cleaning the blood. I wake up with the laser running the meridians balancing the Chakras or using one of the custom frequencies for issues I have going on in my body at the time. i.e. Epstein Barr, Candida. An hour later, when my feet hit the floor, I am totally energized, centered and ready to start my day.

- Barbara R.

Used the laser with the Violet probe on patients wrinkles and sun damage could tell immediate difference. After 12 treatments, she thinks she looks at least ten years younger.

- Cheryl S.

After using the Quantumwave Laser on one of my patients who is paralyzed from armpits down. After six weeks of treatment, he was able to sit up in bed by himself, which he hasn't been able to do since his accident. We will continue using the laser until he can walk again.

- Cheryl S.

My next door neighbor's 14-year old daughter gets migraines and had another one two nights ago. She called and I went over there with my laser. I started using Unwind on the temples, then Quantum and Relieve on her abdomen. She had been throwing up, but after 20 minutes she went from a pain level of 10 to 5. Usually these headaches last three hours. I checked with her Mother the following morning, and she had remained pain-free throughout the night.

- Polly C.

I volunteer at a No-Kill Cat shelter in Palm City, CL. Last Christmas Eve, I went to check in on a cat that had leukemia as he had not been doing very well, and wasn't expected to survive over the holiday. He was lying flat on a shelf when I arrived. He hadn't been eating. When I picked him up, he was limp. I laid him on my lap and started lasering him. I worked for about 20 minutes. Half way through, he looked up at me with this strange look on his face. I then used my Red Probe and worked on his jaw as he had previous mouth issues. About 10 minutes later I used the Infra Red Probe on him for another 10 minutes. I used Unwind, Pleo, Ozone and Detox. He suddenly jumped off my lap and jumped up to where the food was and ate the whole plate. A couple of days later, he had an infected tooth removed and is doing well. It's now been almost a year and he's still doing well.

- Polly C.

I have had insomnia for over ten years. Since I began using the laser, I have had no trouble falling asleep. I no longer take pharmaceuticals to sleep.

- Lisa M.

I have extreme neck and back pain due to fibromyalgia. The laser reduces the pain dramatically and helps me to relax and control my anxiety.

- Joel G.

I have had great results with using the laser on my arthritis. My fingers are very sore and swollen. After several months of using the laser, I have no more pain and my fingers aren't swollen and are getting back to normal size. I also had a trigger finger that would stick all the time – it doesn't anymore!

- Trishia B.

I'm a Senior Olympics 5k competitor (3 Gold Medals) and had a serious fall and injury last year. Two weeks of laser treatments and am now pain free. Still have a little weakness in left leg, but it's improving daily and am now running again.

- John B.

Last week I was cooking and spilled hot oil on my right arm under the wrist area. I immediately placed the laser in the area on the Relieve setting and the pain was gone. There was no redness or blisters.

- Awilda L.

By Father's Day of 2010, my weight had slowly climbed to 145+. Although I've had a Quantumwave Laser since 12/09, I had not used it consistently. After seeing pictures taken of me on Father's Day, I decided it was time to take action. I used the laser almost every night and in addition to falling asleep more easily, the pounds began to drop off. Within two months, I had lost 20+ pounds. My cravings for chocolate and ice cream have ceased. I'm now comfortable in my own skin and my bikini.

- Barbara L.

My husband tore his rotator cuff two months ago. The Orthopedic Surgeon x-rayed and said he needed surgery. I encouraged him to try some alternative therapy and suggested he try the laser. After three hours, his pain became manageable. It has been one month since he started using the laser and his pain has reduced by 70%-80%. Next month we are going to ask the doctor to take another set of x-rays to obtain some physical proof of this healing.

- Virginia M.

I worked on a man who had ALS. After working on him for 1-1/2 hours, he was able to use his hand that he hadn't been able to use before.

- Lisa T.

I had a red hot rash on my right foot, which was so bad, I could not sleep. Prior to using the laser, I had tried creams, but with no positive affect. I used the Quantumwave Laser on the Unwind program from two feet away and all itching completely disappeared with only an eight minute application. Thank you.

- Harvey P.

43 year old post back surgery patient with 2-8 inch titanium rods in her back. With the laser protocol she is now, for the first time in six years, able to exercise using her elliptical machine. She is so grateful.

- Judie R.

I am a new laser owner and have treated several people, but the most impressive testimonial was from a diabetic man who had a significant reduction in his blood sugar level.

- Mara W.

A couple of months ago, while sitting on my bed, I had an acute, stabbing pain in my upper right back. My laser was lying on the bed beside me so I grabbed it and applied the Unwind and Quantum protocol 2-3 times. The pain subsided. I went to sleep but was nausea all night and use the Soothe protocol on my abdomen. When I awoke the next morning, it was evident I had passed a kidney stone. I continued using the laser on my kidney and bladder on Pleo & Ozone for a week. I know that using the laser kept me from having to go to the Emergency Room like I did the first time this happened.

- Sharlene B.

I am a Biofeedback Specialist and have recently added the cold laser therapy into my practice. I have had amazing results. Recently, I helped a person with two nodules on the Thyroid gland. The doctor told her that she should do surgery and take out her gland because it wasn't functioning anymore. After using the laser on her for three weeks, the nodules have already gone and she is feeling much better.

- Osineida G.

For several months now, I have had a recurring bladder infection. After using the Pleo setting a few times, the symptoms completely went away.

- Ann H.

My son had a sinus infection from under his eye to his ear and to the ridge of his nose from an infected tooth. He used the laser for eight minutes, woke up the next morning and the swelling and infection were all gone and he had no more pain.

- Judie R.

My husband burned his hand in a grease fire last weekend. The burned area quickly became red and raised on his whole thumb and pointer finger. I used the laser on the area for 30 minutes. At the end of that time, the red was gone, the raised areas and pink areas were normal in tone. No blistering ever occurred.

- Judie R.

I had a severe rotator cuff injury in my shoulder and tried many different Therapies to help it. After a year with no success, it was so painful, it compromised my life to the point I could not ever dress myself. So many things I liked to do such as: cook, work out, clean house, went by the wayside. Just before I was about to get surgery, I had a laser treatment which made my shoulder about 80% better. After two more sessions, it was back to normal. I could not believe my good fortune. I ended up purchasing a laser and it's been three months now and I haven't had to do any further treatments to that shoulder.

- Mara W.

My neighbor invited me to meet her 85-year old visiting sister. Upon meeting her, I noticed her left hand in a fist, arm bent against her waist. I asked if she'd hurt her arm, to which she replied, "I had a stroke three weeks ago and haven't been able to open my hand since then." My neighbor, whom I've treated with the laser, asked if I'd give her sister a session. I treated her for eight minutes. Her hand independently opened. The following day, she dusted her sister's whole house with her "new hand". Her hand has continued to be working normally.

- Judie R.

Had a patient that had been told she needed both knees replaced. After one treatment with the Quantumwave Laser, her pain was gone and she was able to climb stairs again. I treated a patient that lost her hearing 15-years ago. Doctors couldn't help so she just learned to live with it. After using the Quantumwave Laser only a few times, she can hear again. She now enjoys talking on the phone and being able to hear with that ear. I had a patient that hadn't had a bowel movement in seven weeks. I use the Unwind Protocol on all her key points as well as the colon and within 1-1/2 hours, she had a normal bowel movement.

- Cheryl S.

I recently was on a road trip of about 2600 miles in a week. My back was in some pain and I could tell that it was locked up. I had done some stretching, which usually helps but hadn't this time. I used the Unwind setting with the laser and moments after, I got up from the table and my back popped, and it released and felt much better. Thank you.

- Mark B.

The most significant and life transforming experience I have had from using the Quantumwave laser is I feel happy again. I have had a lifetime struggle with depression and anxiety. It's genetic and runs in my family. Because of the magnificent laser, I feel alive again. After a stressful day I can Unwind and use Quantum to access my true authentic self. Thank you for creating such a wonderful tool for humanity.

- Maria P.

My 23 year-old son has taken Adderall for four years. He gradually began to use more to receive the same effect to study for his high level college curriculum. Of course, this created a merry-go-round of sleepless nights for 2-3 days in a row. Sleeping at off hours, incomplete sleep patterns, which created health, emotional dis – ease. When I use the Basic Unwind protocol on him, he simply goes into his room and falls asleep for 6-7 hours at a time.

His goal is to begin to regain balance in his life and we believe that the Quantumwave Laser has started him on his journey.

- Brenda C.

I have been seriously trying to lose weight for 18 months, working with a trainer and counting calories. I have seen some success, but very slowly. However, due to an injury, I had to stop activities and the weight loss stopped as well. I successfully treated that injury with the laser. Then I tried using it for weight loss. I was very surprised at the phenomenal success. I lost more weight in two months than I lost in six months last year. The surprising thing was I felt better, more energetic and happier. I'm feeling great and getting slimmer.

- Mara W.

I have a feral cat that came onto my property. He eventually tamed up and lives on my back porch. I checked on him on Wednesday and he was fine. On Sunday, he had something sticky in his fur. I assumed it was pine sap and went to brush it out, only to find a 2" gash. I was looking at muscle and it smelled bad. I cleaned the wound with Hydrogen Peroxide, and then lasered it for 20 minutes using Unwind, Quantum, Pleo and Ozone. I then filled the wound with Colloidal Silver Gel. The next morning I was amazed. I was no longer looking at muscle. It had healed over. I talked to the Vet and told him what I had done, and he said his partner had bought a \$17,000 laser and it had really helped his back. He said if I continued lasering the wound, he would not need surgery. The wound healed beautifully within a week. No infection.

- Polly C.

An acquaintance had a cancer cut out over his ear next to his temple. It was deep, raw and red. He is a dive master and was lamenting that he wouldn't be able to dive the lobster mini season. I offered a laser demo and went to work for about an hour with full Unwind protocols and utilizing the red probe as well. In less than seven days, he went for a follow up with his doctor and much to both their surprise, he was given the permission to dive.

- Michelle J.

Despite therapeutic intervention, throughout most of my adult life, I have had a severe TMJ problem. I have been unable to open my mouth wide without pain and a loud clicking, grinding sound. In order to have dental care, the dentist would put ice packs on my jaws and stop periodically to keep my facial muscles from going into spasm. While doing the Unwind protocol with my new laser and using it in the facial area, I yawned and suddenly realized my mouth was wide open. This was several weeks ago. Every day I open my mouth wide to experience this miracle.

- Ali S.

Before getting my laser, I had been through seven great stressors including loss of my husband (under 65), my house had 8' of water in it from Katrina, and I lost three other family members. Florida became my healing place. I received my laser in December 2009 and started using it ASAP. I lost 30 pounds, my stress decreased over 60%. I use the facial program and my upper eyelid doesn't droop anymore. My wrinkles are much improved. I also have had severe pain in my right knee for several years, which is now gone. My dog woke up one morning not able to walk on his back leg. After two treatments, he was able to jump and run again. I also rescued a dog that had been out on the streets for 2+ months, and she is now eating, running, drinking. Still have some further treatments to go and look forward to using her as a success story next time around.

- Karen S.

I used my Laser on my lungs when I started coughing up some blood. Within a few sessions, the blood and the coughing stopped. I love my laser!

- Margaret F.

I have had knee pain for a couple of years. After using the laser for a short time, my knee pain and discomfort have gone.

- Tom R.

I used the laser on a 64 year old person who had had Hepatitis C for over ten years. His liver enzymes and ammonia levels were elevated to critical levels. And his platelet count was very low. I used the laser on Ozone, Pleo, Liver and Detox for nine days. Then the patient went back to his Doctor to be retested. His test results indicated that his blood values were in the normal ranges. And his liver panels had not been that good since he had been diagnosed ten years ago! Since all liver enzymes and ammonia levels were within the normal ranges, his Doctor recommended he return in three months for additional testing. I was astounded by the objective results in the blood values!

- Cheryl M.

I purchase my laser in Boca Raton in September. My Shit-Tzu accompanied me to that event, and was very miserable due to a chronic ear infection. I lasered him, and not only did this take care of his ear infection, but totally took care of his anxiety as well! Thank you Paul and Lillie for this amazing device!

- Meredith M.

I have an old back injury from a car accident that flares up when I over exert myself. My good friend Charles worked on me with the laser for several days. Since I do a lot of physical work and heavy lifting, I am usually sore after too much exertion. Since my laser sessions, I am not feeling that usual soreness...WONDERFUL!

K.

Last night I had my first laser treatment. My sleep that night was much better than I have had in a LONG time!

- Patricia V.

I have suffered with Gastro paresis for three years as well as debilitating fatigue. After 7 laser treatments, I have been able to eat most anything I want, AND I have gained 12 pounds after a 50 pound weight loss! I used to spend half of every day in bed and now I am out of bed every day. And there has also been a big improvement in the frequency of my migraine headaches.

- D.

Getting daily laser treatments for 2 weeks allowed me to have the energy to take an important trip to New York for 10 days. Since then, I have become a laser owner, and do laser sessions on myself several times each day.

- Joan G.

I use the laser on my cat for anxiety. The cat would always run under the bed at the slightest sound and stay there for hours. Now she jumps up next to me and visits.

- Alice S.

The laser is just Amazing! Working with the laser for a friend in Mississippi has changed his life using his photo. Physical pain in his legs has stopped.

On an emotional level he has opened his heart from past relationships and is over-coming the fear to love again.

This is long distance healing work.

- Kathy J.

Have had experienced Quantum laser treatments for approximately 4 to 5 weeks and have been able to not need to continue to take 5 different medications prescribed to me by doctors.

- Dan C.

First seminar I walked the very painful leg and knee joint ?? We were able to use laser at seminar. I concentrated on the knee. The next day I could walk with no pain. I have been diagnosed with fibromyalgia and osteo-arthritis many years ago.

- Dianne D.

I was at an intro meeting last night and got to use the laser throughout the meeting. I work night shift at a hospital and was worried about falling asleep last night. I amazingly had a beautiful night's sleep and am now attending the workshop today, fully rested.

- Jan C.

Before I bought my laser, my stress level felt like it was a 10 out of 10. Within 2 days of using the laser, my stress level felt that it went from a ten to a two.

- Ann H.

After only one session using the Scalar laser, my son, diagnosed with ADHD immediately started seeing results in sleep and his reading at school. He is no longer in special classes at school. I am so impressed! I can't wait to continue using the laser.

- Nathan L.

So far have used two times; noticed difference with my sleep - deeper. My right knee is a little better.

- Catherine W.

My newest "clients" have been dogs with hip dysplasia. (German Shepherds, "older" dogs) After doing 2 minutes (each area) of unwind on the adrenal areas, occipital ridge and the tail bone sacral area. Then doing 4 minutes of unwind on the hip regions and lower back; then 4 minutes of quantum setting, 2 minutes of the ozone setting; 2 minutes of the pleo setting for inflammation and 4 minutes of the bone setting; 2 minutes of ligament setting and the "grand Finale" of serotonin with the violet probe for 4 minutes. All three dogs were rolling on to their backs pawing the air playfully; smiling and wagging their tails. PAIN FREE with Puppy Energy!!!

- Deborah G.

I've been having nerve pain with my lower back. I used the unwind on my sacrum and could definitely feel a shift.

- Jo A.

I have been using the Quantumwave laser for about one month, 4 days a week. The unwind protocol twice per day. I have noticed I have more energy and has been helping with fibromyalgia. I am very impressed with the results. I was tired all the time and complete body pain due to Fibromyalgia and knee injury. The results have been amazing! I recommend the Quantumwave.

- Irina C.

I had a tooth that was infected and very painful. I began using the laser 2 to 3 times a day as well as an oral rinse. Within 3 days, the tooth quit hurting. I continue to use the laser on that tooth and another tooth that had been infected before. The tooth improved and I have not had to go to the dentist.

- Karen S.

At night I "unwind" and fall asleep instead of lying there for an hour or more. It relaxed me so my mind doesn't race. I'm a stress "eater" especially chocolate and ice cream. I've gained a lot of weight over a few years. After using the laser for a few months, I began to lose weight. I've lost 20+ pounds in 2 months. It has totally suppressed my appetite and taken away my chocolate addiction.

- Barbara L.

Shortly after purchasing the laser, I fell and injured one knee and both ankles. I was just leaving for a beach vacation, but took the laser along. For 3 days I could barely walk, but the pain completely left within the next month.

- Catherine H.

As I continue to use Quantum on the thymus, I continue to appear younger! People accuse me of having work done, but it's Scalar Energy!

- Anonymous

A friend used the laser on my back which was very tight from driving. When I got up from the table, my back popped and the tension was released and I felt much better.

- Mark B.

I am a colon hydro therapist working in a gastroenterologist's office. I prepare the patients for their colonoscopies and digestive disorders. I was amazed how the laser decreased the discomfort of gas passing through the colon. The laser allows the colon to relax thus producing a very productive colonic with additional comfort.

- Suzanne G.

I have been using the laser for 10 months to help realign my spine. I suffer from a herniated disk on my neck and surgery on my tailbone in my early 20's. With blocks at the top and bottom on my spine, I developed scoliosis, twisting to the right. My spine is straight now and I am dealing with a rotated pelvis and leg length discrepancy. I am using the infrared probe to open my hips, release my tailbone, hip joints and knees so that my lower extremities support my body.

- Barbara R.

My old broken arm injury that became very painful during the years is now pain free. I can use my arm with full capacity.

- Gail P.

As a massage therapist, I unwind lots of people. I did an experiment with a lady that had trigger points on the back of both arms. One arm I did trigger point work and massaged. The other arm I used the probe on the fascia and the muscle. The arm that was lasered was more relaxed and less trigger points. Makes my job as a massage therapist much easier. Thanks, Paul. I love you.

- Kimberly K.

Before my golf game I unwind my body and play the best round relaxed and in my still point. It also works on my tennis game. My back needs the laser on a daily basis to feel pain free. My toy poodle had 5 teeth pulled a week ago. The surgery required cutting into the bone. He came home on morphine and in quite a bit of pain. Thankfully, Linda W. had loaned me a laser that week. I used the laser extensively on the dog the day he came home. Prior to using the laser, he was whining from pain. After the laser, he was able to sleep through the night. After three days was himself again – three days!!! I believe he wouldn't have healed as quickly or well without the laser.

Personally, I've had exceptional success on an old ankle injury. Prior to using the laser, I had a chronic ache in my left ankle and when I walked for some distance, I would have to turn my toes under and crack my ankle to release the tension built up from the walk. After the laser, I rarely need to crack my ankle and the chronic constant ache is gone. I recognize the tremendous benefit of the laser.

- Renee N.

I have arthritis in my hands, especially my right thumb which kept me from lifting heavy objects and turning door knobs. The laser has removed the pain from my thumb and eliminated the swelling. I have full use of my thumb and hand now. I love my laser!

- Rose G.

A twelve year old girl came to me in braces and suffering with TMJ. Her jaw had been locked for almost 3 weeks. I used the unwind program on both sides of her jaws and during the first session, the side that was locked, dropped. She was able to open her mouth from then on. I treated her for a full week and she is now pain free from TMJ ever since.

- Jackie H.

I have been helping a friend who has a bone spur on the bottom of her foot. Also, on the same foot she had twisted her ankle several times. She was in a lot of pain, but after 3 treatments, her pain was very much relieved. She also loves the unwinding protocol. She called me to thank me for her massage which I thought was quite the compliment, knowing she said "massage" because she felt that relaxed!

- Robin R.

A woman from the UK with Parkinson's disease has increased energy and feels much younger. She forgot to take her meds one day and realized she was not in pain and did not have any tics. This is the point she realized how much the laser had influenced her Parkinson's.

- Bonnie B.

At a free gathering in 2010, I tried the Quantumwave Laser on my left foot that I had damaged seven years ago. Since the injury, my foot has been partially numb and I experience regular pain in my ankle. After 20-30 minutes of

using the Unwind setting, I had more feeling in my foot than I have had since the injury. My ankle seemed to have more range of motion and less swelling.

- David M.

I've had some amazing results/testimonials from clients and family from dental issues to headaches, sciatic pain relief to neck, knee and arthritic issues. Recently when visiting the grand children, we found each of them having health issues. The 11-year old was having 48 hours of asthma/breathing problems. 20 minutes with the Quantumwave Laser, he gave me an "I Love You Grandma. This was awesome, I can breathe again! My 8-year old daughter had several painful plantar warts on her foot. We visited the dermatologist on several occasions and had them cut out and burned off. They always came back. With the use of the laser for only three treatments, her warts have completely dissolved themselves and not come back.

- Kristin P.

My son injured his knee several times until it was beyond repair and only replacement would help. But after several laser treatments, his knee now doesn't bother him at all.

- Jim P.

I am almost eighty years old, and because of the laser, I do not have to take any medication, which the doctors cannot believe. Old age makes it harder to be excited about life and not get discouraged and depressed, which is so much better since using the probe. Also has done some for my husband. I get so excited about every day experiences instead of it being a drudge.

- B. Pratt

Worked last week with a man who had a stroke 18 months ago. After one session, his speech was clearer and his hand became flexible. He also had symmetry in his smile.

- Judie R.

My husband had a rotator cuff tear and would require surgery, but we were leaving on vacation so he went to our Therapist who was using the Quantumwave Laser and after three sessions, his pain was greatly reduced. So we purchased a laser and took it with us on vacation. When we returned two weeks later, his pain was reduced by 50% and he is sleeping better than he has in years. We will never be without our laser. His pain is now 80% reduced. We cancelled the surgery.

- Virginia M.

I am a basketball coach who has seen a lot of ankle injuries. One of my players was playing for her school team and experienced what I recognized as a severe sprain. That type of sprain would typically take 3-4 weeks to recover from. The problem was, her team has advanced to the semi-final round of the middle school country tournament. Without her, the team had little chance to win. The injury occurred on a Thursday night. The semi-final game was on Tuesday night, 12-days later. We treated her for three hours on Saturday and three hours on Sunday. By Sunday evening, all the swelling was gone. She led her team to the championship game. The Championship Game was exactly two weeks from the date of the original injury.

- Bryan H.

I became familiar with the Quantumwave Laser several months ago through my friend. I had been having a pain on the right side of my lower back and had seen a Chiropractor three times and was getting a massage every two weeks. The pain persisted. After the first treatment with the laser, I felt less pain, and by the third session, the pain was gone. It has been about four months since the third treatment, and the pain has not returned. I

- Karen T.

I've been using the laser daily since the last conference in Broomfield, Colorado and also try to fall into Stillpoint as often as I can. I no longer drink coffee or caffeinated beverages, and I've cut down eating meat. The laser helps me to unwind and I sleep so much better. It also helps my sinus problems. I also used to have ringing in my ears and it's now totally gone.

- Mira V.

I have been using the violet probe for facial purposes. At first, there were subtle changes on my face. I saw the eyes lifting. After using it for about 2-3 weeks, I noticed a lot more changes. My face is smoother, clearer, less wrinkles. It is wonderful. I love my Violet probe.

- Jennifer W.

For five years now I've been dealing with a post traumatic brain and spine injury. I just lived with pain. Cognitive and speech problems, difficulty understanding, reading and memory. I struggled with my balance and walking. Continuous ringing in my ears along with my vision field being cut down. I was always exhausted, had little energy and doing only a few daily activities was possible. After one session, the pain in my hand and wrist was gone. After two sessions, my energy is coming increasing and it does not take as much effort to do things. After four sessions now my consciousness has shifted so the little things are no longer a bother. My stamina and overall body strength has increased and can handle more. My allergy reactions are not as severe. So I see it this way... I go into a session as one person and I come out another. Each time is like seeing the world through new eyes and a healthy body. For the first time since my injury, the injured part of me is much smaller and the whole of me feels so good, joy filled and happy. Thank you for this awesome laser that aids in creating healthy new life each day.

- Charlene F.

I was working on a patient for IBS and found her heart had no energy in it and was testing for three heart supplements. She was a former breast cancer survivor and had a mastectomy. The scar tested that it had a connection to the heart. After lasering the scar for a couple weeks, her heart tested that it was fine and didn't need any supplements anymore. I've also used it on myself for pain after an auto accident with great results.

- Judi N.

Two weeks shy of one year ago today, the ceiling in our home collapsed and inundated us with mold that had been growing above the ceiling in the living room. I got seriously sick with four types of fungi growing in my lungs. The medical doctor at the specialized Mold Laboratory in Texas had never seen such a bad specimen. I was fortunate to be introduced to the Quantumwave Laser in December, and it has made a tremendous difference in my healing where strong drugs could not make a difference. All the light treatment and pauses to go into Stillpoint on the first day at the Stillpoint workshop in San Diego has left me feeling so much better. No more wheezing. Thank you so much.

- Denise H.

I have a client who is 12-years old who has a terrible case of adrenal fatigue I have ever seen. Progress has been slow. The first time we used the laser with him, his Mother looked at his face and said "I have my kid back." He has needed ongoing treatments, but finally believes he can get better. The laser gave him hope again.

- Denise N.

I love my laser. I purchased it three years ago to see if it would really assist in a broken toe. My toe was twisted, a 1/3 turn to the right facing my large toe. Very painful. I used the laser at the presentation and to my surprise, by the end of the meeting, the pain was gone and the toe more relaxed. Within six weeks, my toe was facing upward, pain-free and 90% straight. Amazing is an understatement.

- Donna T.

I'm not one of those people who buy every new gadget that is developed, so when I tell you this laser works, believe me, it does! It has helped me relieve everything from an ear ache to my back going out during a move. And best of all, when my friends say they are in pain, I can actually help them too. This laser is amazing.

- Beth B.

My students refer to my laser as "my funky light." One of my students who is suffering from bi-polar disorder, asked to use my laser while we were working through her crisis. She was drawn in by the light itself. As she spoke her sentences slowed and her pitch became more gentle and soft. By the time we got to the 5th spot and Quantum setting, she relaxed, leaned against the wall, closed her eyes and sat the last eight minutes in silence. My assistant asked her to describe how she felt after the laser beeped. She described her experience as a "natural high." She said it was like how she felt after an exhausting cry where all the energy and stress just left, and was replaced with

the relaxed feeling of the natural high without all the tears. She had 10 minutes left of her lunch and asked if she could lie on the table for a nap with the rest of her lunch. She returned to class after calling her mom back to say she no longer needed to check out of school to go home. She was going to stay the rest of the day. After seeing this, my assistant said "if your funky light can do that for her, get over here and do that for me!"

- Denise D.

I had extremely high blood pressure. Immediately I felt more energy and my BP began to go down within three months, I have been able to use 1/6 the amount of supplements and my BP is now below 140/90 daily. Now I feel free to go and do things without a case of supplements. The laser is so easy to carry and use.

- Davida S.

Lasers have helped my limp in one session. My bad meniscus is almost pain free. I would recommend it to anyone.

- Bruce M.

My friend who had a very severe back problem – could not stand for more than a minute or two; couldn't sleep, etc. She heard about the Quantumwave Laser. She began treatments. Now five weeks later she can stand long enough to teach her Sunday school class and she can drive again. She is a walking miracle because of the laser.

- Pat B.

After a fall while cross country skiing two weeks ago, I had hurt my hip. I put the laser on it for about a ½ hour. The pain disappeared and no bruising happened, which I thought for sure would occur.

- Mara W.

Last summer I injured my left knee while mowing the yard. I was not able to work for six weeks and had exhausted the medical treatments offered and was told that I needed a knee replacement. I had unlimited pain medications. My nephew shared the success of these treatments with the laser for his neck. I thought I would give it a try and that was the best choice I could have made. I am able to work and do most anything that I need. I purchased a laser and am very thankful for my continued good health.

- Vickie T.

My 17 year old son has always run with stiff legs. He has never been able to run with bent knees. After using the laser only one time to integrate his reflex points, he now runs like a champ.

- Cheryl G.

Went to the dentist in December with one of my molars hurting. After x-rays were taken and the dentist had checked the tooth, I was told I needed a root canal and he'd give me the number of a specialist. I said, "no" that I was going to use the laser. In January, six weeks later, when I went for my cleaning, my x-rays showed the spot on my tooth was lighter. The pain was gone. "Keep doing what you're doing" the dentist said.

- Dawn R.

The scars I have from chiggers (six years ago) are almost gone from using the scar setting on the laser.

- Dawn R.

I had a very painful infected in-grown toenail that I was using Olive Leaf to treat. After doing an Unwind session with the laser, I proceeded with using the red probe on Pleo, Ozone and Cell Regeneration settings. After two days, I am pain free and Olive Leaf no longer muscle tests for me.

- Sandy K.

I use the Quantumwave Laser on my neck each night to ease the pain and stiffness. I spent a couple of nights with my daughter and did not take my laser with me. I really noticed a huge difference in the stiffness and pain. I will not travel again without it!

- Neka W.

On May 6, 1995 I fractured my L-3 vertebra in an on the job lifting accident. The medical treatment I received for the first two weeks of the injury missed the fracture, because I never saw a doctor because I was sent to a sports medical clinic and they misdiagnosed it as a sprain. The pain in my lower back never subsided in those first two weeks and I was finally sent to a real doctor, an orthopedic surgeon who ordered an MRI and a radioactive dye X-ray which revealed the obvious damage. By the time the injury was properly diagnosed my body had begun to heal itself by growing cartilage between all the fractured vertebra bone pieces which eliminated surgery as an option. I was put on a regimen of prescription painkillers starting out with Vicodin. After six months the Vicodin became ineffective. They graduated me to Norco- a stronger version of Vicodin. Within a year Norco became worthless to block the constant nagging pain which never let up, the Norco simply took the edge off the pain for less and less time per dose. My work comp doctor then put me on the lowest dose of Oxycontin; ten mg per dose, three times per day and that worked. I was very satisfied with the way the Oxycontin managed my pain however, time took its toll and the dosage became ineffective, so he bumped it up to twenty mg three times per day, and again I was pleased with the results for a while. The next dosage bump went to forty mg three times a day which worked but became scary because I now realized that I was hooked on opiates and literally making doctor appointments to get my next refill. I became unmotivated to even get out of bed until the oxy kicked in. Life took on a new meaning for me, an endless cycle of doctor appointments and getting prescriptions filled. I started to see my life spiraling into a bottomless black drug addicted hole. As expected forty Mg's became ineffective so the good doctor stepped it to eighty mg per hit, three times per day. That became insanity when I realized the day would come when even eighty mg would become worthless. I expressed my fears to the good doctor, and he said that it was time to move on to a trans dermal skin patch containing Fentanyl, which needed only to be applied once every three days. Of course they worked well and I had some of the mental strain relieved for a while. I talked the good doctor into letting me change out the patch every two days allowing me to build up a nice little stash of those nasty stickies. When it became time to increase the dosage on the patch, the good doctor allowed me to use two at a time. By this time I am now an experienced and creative drug addict, and soon learned to soak a paper towel in alcohol and lay it on the patch and hit it with a hair dryer on high heat. This turned me into a junkie with a literal needle in his arm around the clock seven days a week. My whole life was about my drugs being supplied by a professional drug dealer with a white medical jacket on and a Dr. in front of his name. Finally the day came, six years later, when I woke up and had had enough. I told my doctor I'm done with this life of addiction and need to get off this crap, he said that it would take about three days to kick the habit I was so addicted to. He lied, it took me three weeks of nightmarish, bedridden withdrawals to kick. At one point a week into the withdrawals, I almost caved and put on a patch, but realized all the pain and agony, would have been for nothing, so I struggled through and came out the other side clean three weeks later. I lost my marriage though, and that hurt me the most. My wife simply got tired of my opiate mistress and never looked back. I have learned how to live with constant pain without using opiates or and kind of prescription pain killers. It's hard but after a while you mentally begin to accept a future of constant nagging pain, but never the hurt of having a wife check out of my life. Four years later I found an acceptable solution to this miserable post opiate life when I met a friend who had a Scalar Wave Laser device which I believe after one twenty minute session may have given me some relief. A bit skeptical and a little snake oilish I continued with an other four or five twenty minute sessions. I was glad I did because after that I was feeling some real relief to the point I forgot I had back pain for several hours at a time. I tried the laser on an old softball knee injury and felt relief there also. I continue with the sessions whenever the need arises with very satisfactory results.

- Richard R

Last Saturday at midnight I found myself in the local emergency room after badly spraining my foot. The pain was excruciating. Typically recovery from such an injury could take 6 or more weeks and particularly at age 90. Returning home in the wee hours of the morning, my son-in-law immediately began treating me with his Quantum Wave Laser. By the next morning, my pain was dramatically reduced and I felt encouraged. Forty-eight hours after the injury, the swelling was gone, pain was greatly diminished and I actually dared to stand on the foot. I can tell you that my foot seemed fully healed 72 hours after the injury. We are all amazed and thrilled at my recovery and thank Paul and Lillie for making this possible. I recommend this highly to everyone.

- Raye B

I had a serious burn on my arm. I used a sulfur prescription from the doctor which made it worse. It became swollen and infected. I started using the laser and within two days, it was healing. Now there's just a small mark which I'm sure will disappear with the Scar protocol.

-Sharyn B.

My 5-year-old granddaughter was bitten by a brown recluse spider, and within 24 hours her upper thigh began to swell and get very hot. The area where she was bitten was very dark purple, and she developed a fever. The area looked infected and was very swollen. We treated it with Epsom salt water which cooled the area. After that we put the laser on it set to Unwind, Pleo, and Ozone. After the second treatment, the site of the bite opened and pus and blood came out. My daughter rinsed it off with water again and treated it with the laser again four times for four minutes each. After each four minutes, the area developed a pus ball which came out. The redness disappeared around the bite and the swelling went down. Within three days, it was not swollen or infected at all. No shots, antibiotics or doctors!

-Jackie H.

I have experienced years of tightness in the neck and shoulder muscles. It has caused lots of pain and cost me many chiropractor visits. Using the laser has relieved 90% of the problem

-Yvonne F.

I burnt myself ironing. The one inch wound was not healing. My daughter applied the laser on the wound thinking it would help it heal faster. I saw red dots on the wound and the scab started to form that afternoon. In a couple of days, it healed completely.

-Esther G.

I have been losing my hair for the past couple of years. I started using the laser three weeks ago, and my hair has stopped falling out.

-Katie

One of my patients, who is in her eighties, has had ankle pain for twenty years. Since her first laser treatment, she has experienced no ankle pain.

-Dr. Paul F.

One weekend, I had my Quantumwave Laser with me while at my friend's house. She complained about TMJ on the left side. I used the Unwind protocol on her for about eight minutes. Afterward, she was amazed that she could open her mouth wide without the usual pain.

-Bill Z.

I met a woman whose horse contracted EPM, a protozoa infection in the blood that affects the nervous system. This caused the horse to be unstable and fall down when turning around in her stall. Vets insisted on putting her down. I suggested working the Quantumwave Laser on her that afternoon. For two hours, we used Unwind, Quantum, Relieve, Pleo, Ozone, and Nervous Sys settings on the horse. She stabilized. Within a few days, the horse began to eat and sleep and the symptoms were gone.

-Deborah H.

A most profound laser experience happened when I was having lunch with an acquaintance that had a severe migraine attack. His head hurt so much that he could not eat. I had my laser with me and used it over his point of pain for three minutes. Immediately, the headache was gone completely and he ate his entire lunch.

-Philip C.

When I press a certain point, I have felt an acute pain in my left ear for years. Today, I set the laser on the Ears setting and placed it on my left ear for 16-20 minutes. I was surprised. I can press the point that always created pain before, and now it does not hurt. It is amazing!

-Alex

A friend of ours had neck surgery. Several months afterward, his ears began ringing constantly. He called his surgeon who said it was a common side effect of the surgery. The surgeon said he could provide a prescription that would help the ringing, but my friend decided not to use medication. A couple of months later, my wife spoke to him

and he told her about the problem. She offered to use our laser on him. After thirty minutes, his ringing was totally gone. He was dumbfounded!

-Kelly R.

Eight years ago, I was hospitalized for one week. It felt like my body was shutting down beginning with my kidneys and my eyes. Then I began to become bloated. Doctors ran many tests with no results. I was on antibiotics and a fluid drip all week. I had been moving to a new home and was exhausted and dehydrated. This past July 4th weekend, I was working hard in the yard, was sweating, and became exhausted. My kidneys started aching. I started getting bloated. And, my eyes ached. When I went to the ER, I told them about the incident eight years earlier. They had no idea what was wrong and sent me home. My wife used the laser on me, and in one hour I was 70% better. By bedtime, I was 90% better. And I was 100% by the next morning! When I went to our D.O. the next week, he studied my files and said it was Rhabdomyolysis. It is an extreme muscle fatigue condition combined with dehydration. Muscles were breaking down and dumping huge amounts of protein into my system that were clogging the kidneys and shutting down my system. The doctor said that it can easily result in death.

-M.

I had a broken patella on my left leg in November, 2008. It required surgery, eight weeks of immobilization, and then physical therapy. The result was a lot of scar tissue and very limited motion at the knee. I got my laser 5-6 months ago and began using it on my knee. My range of motion has greatly increased and still continues to improve.

-Glenda R.

My wife broke her neck several years ago. Though she has fully recovered from the surgery, she still has recurring pain from time to time, especially when the weather changes dramatically and there is a large drop in barometric pressure. When she feels that coming on, she uses the laser and it terminates the pain and aching.

-S.R.

My brother was in the hospital for blood clots in the leg and lung. I used the laser on him with the Unwind setting. I added Pleo on the tailbone and Ozone on the heart. One vein was almost totally blocked and three others were partially blocked. Three weeks later, he had another ultrasound of the veins. The tech told my niece that she was amazed at how well he had done. The vein that was totally blocked showed near normal blood flow. The other veins were also open and flowing well. She was so surprised at how well the blood had responded to the blood thinner treatment. I told my niece I had done several treatments on him with the laser. I feel that the laser was responsible for the improvement.

-Karen S.

I used the Quantumwave Laser on my face for anti-aging. After a few months, I had poor eyesight and thought the laser did it. I rushed to the eye doctor and he said my eyes improved so much that I needed new glasses!

-Mary Lou W.

I experienced a release of TMJ pain through the use of Unwind, Quantum, and Soothe. There has been no recurrence of pain in six months.

-Terry C.

As a holistic practitioner, I was called to work on a dog with non-Hodgkin's lymphoma. He was given a prognosis of three months to live. We worked on him with the laser to support his energy and body. Using the laser, we boosted his immune system. We used Detox and activated his lymph system. He was also given some herbal support. It has been one and a half years since the prognosis was given, and he is happy and full of energy.

-Susan K.

I injured my tailbone a few years ago which caused a lot of pain when I sat too long. I travel a lot, and sitting on the airplane was very uncomfortable. I tried chiropractors and massage therapists, but they did not work. I used the laser for one week for twenty minutes a day. Now I can sit for hours in an airplane or car with no pain.

-Linda T.

I discovered a ganglion in my wrist. After a few sessions of Unwind, Quantum, Pleo, and Ozone, the ganglion was gone.

-Ann K.

My mother lost her ability to communicate verbally this year after my dad's death. She uttered sounds and gestured, but seemed very confused most of the time. Some days she could articulate a few words. I used the laser on Mom with the Unwind and Quantum settings for about an hour. During that time I focused on Mom's head. Finally, I decided to test her abilities. She began talking clearly and used words that would not have surfaced prior to use of the laser. It was amazing to hear my mom speak again.

-Anonymous

I felt a sweetness running through my body, especially when I placed the laser on my throat and stomach. It made me feel very relaxed. The back of my right shoulder has had a sharp, stabbing pain when I move a certain way. After placing the laser on that shoulder for fifteen minutes, the pain was gone.

-Valerie C.

I am so excited about my experience with the laser! I had an area in my lower back that was sore and felt out of place. In just a few sessions, the soreness was totally gone.

-Cynthia M.

We have a race horse that has had cysts in each nostril. One side was totally closed off and the other nostril had a medium-sized mass. I used the laser on her twice a day, and on the tenth day the side with the medium mass was clear. She was able to run again. I am still working on the other side. Also, I had a problem with muscle spasms after taking Lipitor for high cholesterol. After I started using my laser, I haven't had one spasm since.

-Alice S.

I had severe pain in the left heel of my foot due to plantar fasciitis. After four sessions using the laser, the pain was gone. That was two years ago, and the pain has not returned.

-Cindy R.

I was diagnosed with carpal tunnel syndrome and was scheduled for surgery. A friend heard about my problem and offered to try the laser treatment. After several treatments, I regained the use of my right hand.

-G. H.

I had a growth that had developed on my right eye. It was slowly getting larger, but the eye specialist and doctor both said there was really nothing I could do about it. It didn't hurt, but I felt it every time I blinked. I used the violet probe on Unwind on it for about a month. It is still there, but has reduced in size. I can no longer feel it when I blink or put on makeup.

-Judi T.

I am a licensed spiritual health coach and work in the area of trauma and abuse. I use the Scalar Wave Laser to help clients unwind and access core beliefs that are self-limiting. The SWL technology helps to gently and profoundly erase that negative cell memory that gets stuck at the cellular level. This process helps clients relax, achieve peace, and tap into the abundant energy of the universe to heal and become whole.

-Lydia P.

I woke up with my ears aching about 5:00 a.m. My glands were very swollen. I took the laser and used the Unwind protocol on the back of my neck and on each side of my neck just under the ears for several twenty minutes periods. Finally, I set it to Pleo and used the laser on each ear for twenty minutes. By 10:00 a.m., the swelling was almost gone and my ears were no longer aching.

-Dorothy D.

I have an old injury on my tailbone from falling on a rock when I was 22 years old. I also have spinal stenosis. I have trouble standing for any length of time or walking very far. When I use the laser, it takes the pain away and I am able to continue doing what I was doing. I use the Unwind and Unity settings.

-Linda B.

I had hemorrhoid surgery in November, 2010. The doctor said he had difficulty with finding enough flesh to do the surgery properly, and he said that I would have huge scar tissue. I have used the laser regularly and the doctor is surprised that there is so little scar tissue.

-James G.

My sister had shingles and a yeast infection. After two sessions, she got rid of much of the pain. After twelve sessions, she was completely pain free. The doctor was amazed. He told her that she was very fortunate because the condition could last for a year or more.

-Cecile M.

I have had very positive personal experiences using the laser. For example, my plantar wart was gone after two weeks of daily treatments.

-Lynne P.

My husband had a large lipoma on the back of his neck. He was slated for surgery but we started lasering the lump. He had to go for a pre-op appointment and there was a significant reduction in the size of the tumor. The doctor noticed the size difference. We went ahead with the surgery even with the decrease in size. But, we have used it since to melt the scar tissue.

-Kim S.

The Quantumwave Laser was tremendously helpful to me in recovering from burnout. I could not seem to get past debilitating anxiety until I got my laser. By using Unwind and Quantum daily, I am now free of anxiety. It's wonderful!

-Karen F.

When I cannot sleep, I use the Relaxation and Sleep programs for complete relief. I have controlled my bladder infections through using the Pleo and Bladder protocols. Finally, the Heart program has helped me control my blood pressure. I no longer have to take medication.

-Jean S.

For the past six years, I was taking two different heart drugs, arthritis medication, antibiotics for chronic bladder infections, and pain relievers for migraine headaches. In April, 2010, I was diagnosed with moderate kidney failure which was caused by the arthritis drugs. In September, I purchased a laser and have used it every day since. I'm delighted to report that I am now off all medications of any kind, and kidney function is improving with each monthly test. Another perk is feeling much more relaxed and able to deal more easily with stress.

-Lorene E.

I have Type II diabetes and was using four pills of Metformin daily. My blood sugars were running between 6 and 7.9. Now after several months using the laser, I am only taking two pills per day, and my blood sugars are almost always below 6.

-Ethelda P.

I have been a massage therapist for twenty years. One client had severe shoulder and elbow pain. He had tried several modalities for months with no positive results. After assessing the range of motion, I used the Unwind program and continued with a massage of the neck, back, and arm. In one session, the pain was completely gone and range of motion was 95% restored.

-Lidia P.

I have a Shih Tzu Maltese named Frank who had a cyst the size of a large marble over his left eye. My son-in-law wanted me to take him to the vet to have it removed. But, Frank is fourteen years old, and I thought it would be too

traumatic for him. I used the laser on him a few times. About a week later, when I was out of town, my daughter called to ask what happened to Frank's cyst. It was gone!

-Judy T.

At night when my husband is snoring and his legs are twitching, I turn the laser on Unwind and Cohere. Within minutes, his breathing deepens, snoring softens, and his legs are "quiet". He awakes happy and rested each time.

-Julia

My brother had a double knee replacement in November. He was diligent in doing his exercises and stretches. He had a bit of infection that developed in one knee. I lent him my laser and after a week, he went for physiotherapy. The therapist told him he had never seen anyone heal so quickly. He drove to Vancouver at Christmas with no problem. By mid January, he had full mobility.

-Helen P.

I bought the whole laser family because I was in a rollover accident and could not turn my head without pain. I used Unwind, Quantum, Pleo, Ozone, and Muscle. Now I am pain free.

-Lydia W.

Ultrasound testing revealed that I had a hernia. Luckily, I had been introduced to the scalar laser and had twelve or thirteen treatments on the area. Two months later, the surgeon wanted to do a second ultrasound to confirm the place of the hernia. They could not see the hernia opening. I continue to do treatments to completely heal the area.

-Patti L.

I have been a laser owner since September, 2010. I have had issues with carpal tunnel syndrome that weren't getting better with massage treatments. I used the laser with the Unwind setting, treating my shoulders, elbows and wrists. Within two months, I no longer had carpal tunnel symptoms and my TMJ also started to improve. Since then, I started treating my jaws directly and my TMJ is cured on my left side. The TMJ on the right side is almost gone as well.

-Delilah S.

When I use the Kidneys protocol, I need fewer bathroom breaks during the night.

-Margaretha R.

This year I purchased my own laser and am using the laser for sinus congestion. Since the snow melted and all the dust is in the air, I have had no more headaches. Wow!

-Josie B.

After 26 years with fibromyalgia and chronic fatigue syndrome, I have improved greatly after one year with the laser. I have more energy. My sleep is improved. The pain has eased. And, I have better coordination. The RNA setting is excellent for absorption and weight loss. It gave me hope for recovery.

-Donna P.

A man in his forties was in severe pain and was using heavy pain medications. After working on him with the laser for about ¾ of an hour, his pain was gone. The following morning he confided that he'd been chronically constipated. Sometimes weeks elapsed between bowel movements. That morning he evacuated in volume and speed like never before.

-Dan B.

When I came this morning, I had a very bad headache which I have had for over a week as a result of a car accident. After using the laser this morning, my headache has decreased considerably and much of the stiffness has eased.

Thank you.

-Dale E.

My dad is 91 years old and broke his leg. He was sleeping constantly for about five weeks after the break. I used the Serotonin setting on him. He woke up and visited for over an hour. He was bright and alert for the first time in five weeks. He was communicating and remembering our conversation.

-Barb F.

I developed shingles and was in total shock. My friend asked me to come up and try her laser. With just one treatment the pain, itching, and swelling decreased. I could almost feel my whole body detox during my treatment.

-Michelle M.

I used the laser around my eyes only four times and black floaters were gone. Also, I have reduced the strength of my glasses lens from 2.25 to 2. My eyes have improved, and I can see better driving at night.

-Marilyn M.

I had my wisdom tooth pulled. The spot was very sore so I used the laser. The extraction pain went away for a while, but I kept having pains in my cheek by my nose. I learned that a piece of tooth was chipped off when it was pulled out. I lasered the area and used the probe with the Unwind and Detox settings. One day, I felt a crunch when I closed my mouth. The piece of tooth came out! Wow!

-Julia

I used to have trouble sleeping, waking up numerous times during the night for an hour or two. Since unwinding on Quantum, I have had good, restful sleep. And, I sleep through the night.

-Vonnie B.

From June, 2009 until February, 2010, I lived on 50-150 mg of Demerol every day due to pain in my left knee. In February, 2010, I was introduced to the Quantumwave Laser. I am now off the Demerol and any other pain killers. The only program I used was Unwind.

-Martin C.

A neighbor was having coffee with us one evening. He mentioned he had not been able to taste anything since having his teeth removed two years before. We gave him the laser to use. He used the Unwind protocol for four minutes on each jaw. A couple of days later, we talked to him and his taste had returned.

-Marg P.

I had Meniere's disease of the ear. I would get attacks more than once a week which gave me no quality of life. With the help from laser treatment, I am now free of these attacks. I also had a loud ringing and buzzing in my ear which are also gone.

-Alex F.

Since coming home from a sunny south holiday a week ago, I experienced diarrhea after every meal. Within an hour of eating I was in the bathroom. On the way to the Quantumwave weekend seminar, I used Soothe for four minutes and then Detox for four minutes on my stomach area. I have not had to rush to the bathroom once since.

-Vonnie B.

I had a tooth that was scheduled for a root canal. I was using pain killers to manage the pain when I started to use the infrared probe on the tooth. The first thing I noticed was that I didn't need the pain killers. Over a period of weeks, the tooth began to feel better and better. I canceled my appointment for the root canal. Five months later, the tooth continues to feel better and I have not needed a root canal.

-Myron W.

I have been giving a teenager laser sessions for his acne using the red probe. When he began his sessions, his face was full of red and some purplish pimples and bumps. There was improvement after the second session, and when I questioned him before beginning the third session, he said he had no more pain along the jaw line. His face has continued to improve. He has now had eight sessions. Most of his face is clear with smooth, fine skin. His mother

noted that even the scar he had on his cheek looked better. We will keep working on the spots of acne that remain. He had tried several other products before and nothing had helped.

-Helga Z.

I have had diabetes for 44 years. Since I have been using the laser, I have been able to cut my dosage of insulin dramatically. The laser drops my sugar levels.

-Kevin L.

As a practitioner, I have seen amazing things using my laser. I treated a lady whose right sinus had been completely plugged for two years. After two sessions using the Unwind protocol and the violet probe on her sinus, she could breathe clearly and had no sinus pain.

-Michelle W.

My husband is in the hospital with an infection along a spinal surgery site. A rod had been put in where a vertebra was removed. I've been using the laser along the operation site from both ends to the drainage site. The surface skin had healed, but by using the laser, I managed to draw the infection to one area so it could surface and be drawn off. I used Unwind, Pleo and Ozone. At the same time, because my husband was bedridden, he started to accumulate fluid in his left lung. I used the Unwind and Lungs settings. The doctor was surprised when his lungs cleared up.

-Alexandria J.

I had a malignant lump removed from my breast in April, 2011. Two weeks later, I went to see the doctor. When she looked at the incisions, she said they looked like they were six weeks post-op instead of two weeks. I've been using the violet probe twice a day every day.

-Donna M.

I was diagnosed as bipolar in August, 2010. I had tried medications, but nothing seemed to help with the anxiety that came along with this diagnosis. I have used my laser two to three times daily for three months now, mostly set to Unwind or Quantum. My anxiety level has dropped considerably.

I have been doing laser sessions on a 90-year-old lady with weeping macular degeneration. I saw her every day for a month and used Quantum and Unwind around her eyes. Now, her eyes are clear and the pupil is a normal size. There is no more weeping, redness, or puffiness. My 90-year-old friend purchased her own laser a month ago and does the Unwind protocol every day.

-Michelle W.

I tore my rotator cuff in two spots in my right shoulder. I was in so much pain. I lasered it for weeks on Relieve and Unwind, then Relieve and Unity. It is all healed. I don't have to use the laser on it anymore. And, I was scheduled for surgery, but it is no longer needed.

-Betsy B.

My grandson got his leg burned and his nylon pants were burned onto his skin. The hospital dressed it each day, and we used the laser set to Relieve, Soothe and Quantum. The hospital could not believe how quickly he was healing and that he had no infection. The skin is discolored, but not all wrinkled and gathered like it normally would have been. My friend had four hernia operations, and with the last one he experienced unbearable pain. The surgeon said that the nerves in the bottom of the stomach were caught up in the adhesions. His recommendation was to go in and kill all those nerves. He started using my laser on it with the Relieve, Soothe, Quantum and Unwind protocols. The first night there was such an improvement. In about two and a half weeks, his pain was gone.

-Dorothy D.

Since I was a small child, I was unable to go longer than an hour between bathroom breaks. So, I was teased a lot by family and friends. The first evening I used the laser, I put it on my bladder set to Unwind for sixteen minutes. I was able to go for six hours.

-Jane K.

I had floaters and used the laser set to Unwind. I did four twenty-minute sessions on each side of my temples. Now, I see without obstruction.

-Bambi B.

We bought our first laser last month on a Friday. By Wednesday, my husband and I were arguing over who got to use it, especially on Sleep mode at night. So, a week after receiving the first laser, my husband ordered another laser with a violet probe. This was a HUGE deal! My conservative husband went from nonbeliever to buying two lasers in one week!

-Michelle

My friend had a frozen wrist as a result of a fifteen-year-old break. We used the laser on it with the Unwind, Quantum, Relieve, and Soothe settings. He phoned the next day saying that it was moving and he could push a door open for the first time in fifteen years.

-Dorothy D.

On October 10, I jumped a fence and my foot landed in a hole. Immediately, my knee gave out. With assessment, it appeared that I had torn my medial ligament. If I moved or put weight on my knee, it would give way. When I got home, I used the laser set to Unwind. Later, I used the Muscles, Disc, and Ligaments settings. Five weeks later, I threw my brace away. I have full range of motion and no pain.

-Paula H.

I guess I would call this my aha moment. I had two mercury fillings changed to white. After that, I had severe sensitivity in my tooth. I put the laser on Unwind, then Pleo, with the probe right under my mouth. The next morning as I was eating some raisins and granola, I suddenly realized my tooth only had a pain level of two instead of the pain level nine that I had been experiencing. Wow!

-Val R.

A year ago, I had high blood pressure and was put on medication, supposedly for the rest of my life. Also, my right knee was swollen and aching. Knee surgery was scheduled. I purchased two lasers and began sessions on my body. Now my blood pressure is normal. I'm not taking medication, and the knee surgery is cancelled. I run up and down stairs every day with no pain. I have nine children who are married and have their own families. I bought them each a laser, my best inheritance gift to them.

-Joyce T.

I had Bell's palsy two years ago and lost the use of the left side of my face. The doctors told me I would never regain the use of the left side. When we got our laser, I used it on my face. I am almost completely healed.

-Bryn O.

I bought my laser mainly for my mother-in-law who has rheumatoid arthritis. When we started, she had a lot of pain and swelling. After two sessions, she stopped taking pain killers. The swelling in her hands and legs went down dramatically. We can see the bones in her foot now. We used the Unwind protocol and Pleo on her palms, top of the hands, ankle, bottom of her foot, liver, and kidneys. We also used the Bone and Neuromuscular settings on her ankle. To see Mom going at her daily work with a smile and saying she has no pain has proved to me that my investment in a laser has paid for itself.

-Kyla G.

In April, 2010 I was diagnosed with moderate kidney failure. The nephrologist said the kidney cannot regenerate, and that the best we can hope for is to slow the rate of decline to prolong the need for dialysis. When I was first tested, the kidney function was 44. 60+ means normal or slight dysfunction. 30-59 shows moderate kidney dysfunction. 15-30 requires dialysis, and less than 15 means a transplant is needed. After using my laser since September 14, my last test showed kidney function at 59!

-Lorene

My husband was diagnosed with two gall stones and some fatty deposits in his liver. This was causing him a lot of pain. I set the laser to Relieve and Soothe for two nights for twenty minutes each. Then the next three nights, I set it on Stomach for two twenty minute treatments. After that, the pain was gone.

-Dorothy D.

I've had glaucoma for several years. Last week, I went to my regular eye checkup. Instead of needing three different kinds of eye drops, I'm down to needing only one. And, I only use them once a day at night instead of twice a day. I use the laser program recommended for glaucoma.

-Cecile

My daughter had nose surgery which involved breaking her nose in three places. Her doctor warned her that she should expect massive headaches, bruising and swelling. He prescribed very strong pain killers. I used my laser on her several times before surgery and as soon as she was released. She used it several times a day for the next five days. She took only one oxycontin as a precaution. She had no pain or swelling and minimal bruising. While having this opportunity to use my laser, she also worked on the fibroid cysts in her breasts. They disappeared.

-Marg P.

I had a client who fell and fractured her knee cap. She had x-rays done about one hour after her fall, and we started using the laser approximately one hour after that. We used the laser two days in a row. On the fourth day, she went to the doctor and had new x-rays taken. There was no sign of the fracture and her knee barely had a bruise.

-Lisa J.

I had psoriasis for approximately fifteen years. It was on my hands, ears, feet, and head. I have owned my laser for one year, and I now have only one small psoriasis spot left on my foot. I have also used the laser on my legs to remove dark spots and spider veins. They are gone.

-Jenn H.

My first experience with the laser was a two minute treatment targeting a finger with eczema using the red probe and the Relieve setting. A few hours later, the redness was gone but returned within a couple of days. After two more treatments, the eczema was gone.

-Dianne W.

My husband hurt his shoulder last year when we were moving. He had to move his right arm with his left hand. We went to a practitioner who used her Scalar Wave Laser on it. At the end of one treatment, he could move his arm up to shoulder level which was impossible before the treatment. We were sold. We bought a laser and used it for the next few days on his shoulder. His shoulder recovered completely within one week.

-Diana G.

I have an eye condition called central serous retinopathy. When I went to the weekend seminar in Regina in March, I used the lasers that were passed out and felt they made a difference in one evening. I used it for the whole weekend and ended up buying a laser because of the improvement in my vision.

-Greg M.

I had a third degree ACL tear in my right knee, and I could not believe the pain. The doctor said that it would take three to eight months to heal. I lay down on the couch, positioned my leg on pillows, and went to work with the laser and violet probe. For the next four hours, I used Unwind, Ligaments, and Lymph Sys on the leg. In four hours, I felt a wash of energy move through my knee down to my foot. I continued working and when I stood up, I could put my foot flat on the floor and use one crutch. In two days, I could walk without aid. I had no pain. On day five, I went back to the doctor and she was blown away.

-Jane K.

I had surgery following a knee injury. The Ozone setting took away the pain and discomfort.

-Betty S.

I had a horse go through a barbwire fence. It tore up her foot just above the hoof. This happened in the spring when there was a lot of mud. I used Unwind to calm her. She stood completely still. I used Quantum on the cut. Within a day or two, the cut healed and she never got an infection.

-Kevin H.

Yesterday I was carving a turkey. I was in a hurry and the big knife slipped, leaving a deep gash near the joint of my finger. Blood gushed. I used the laser with the Unity, Cohere, Pleo and Rejuv settings. After twenty minutes, the pain stopped and the blood stopped. Today, there is no swelling or redness. The wound is sealed with a soft scab, and there is no leakage.

-Diane E.

My therapist has used the laser on the thymus and behind my head during every session for the past year. During this time, I have had total relief from the terrible headaches I have suffered since a car accident in 1990.

-Dale A.

My son's girlfriend burned her hand with a flat iron. She was in so much pain that she couldn't go to work that day. I brought the laser and red probe over to her and got her to use the probe with the Unwind, Quantum, Pleo, and Ozone settings. It took a couple of hours using the laser. By bedtime, there wasn't any pain in her hand and by the next morning, there was no blistering. She was able to close her hand without any pain.

-Gisele C.

I had a client with eczema, and used the violet probe on the spots. Within 24 hours, the spots were gone. I used the laser on another client with much larger eczema spots. I used the Unwind and Relieve settings with this person, and over the next 12 to 24 hours the eczema spots vanished.

-Barb F.

My husband had severe pain in his knee. He could not bend it completely. While at our friend's house, he used their laser for four minutes. His pain was gone and he could bend it freely. We now own our own laser and are using it daily. It works!

-Jeanne W.

I am an acupuncture practitioner and have been using the laser on myself and my patients for the last six to seven months with great results. I have seen people come through the door totally anxious, worried, and in pain. Then, they walk out calm and most often pain free. My son's acne has disappeared since I introduced the laser to him, and he's been a great advertisement for the laser among teenagers. Also, my mother had been suffering from coughing attacks for many months. They were disrupting her sleep and daily activities. I used the laser on her throat. That was five months ago, and she has not had a coughing attack since. I love my laser and would not be without it. Thank you.

-Fereshleh A.

My son woke me up in the night with severe tooth pain. I used the Quantumwave Laser and infrared probe on Quantum, Pleo, Ozone, and Relieve. The pain disappeared.

-Paul L.

I have been practicing colonic hydrotherapy since 1987. Although my patients have always had remarkable results, once I started using the Quantumwave Laser simultaneously during the colonic, the results have been life changing. In one case, very severe menstrual pains were resolved by using the Quantumwave Laser during the colonic. A special case is that of a lady whose bowel ended up being paralyzed after an ill-fated laser surgery for polycystic ovaries. Even with weekly colonics, the results were not brilliant and she never felt very well. From the time she came to my clinic and the colonic was first performed in conjunction with the Quantumwave Laser, the result was phenomenal. The bowel emptied easily and thoroughly with hardly any massage. She has now purchased a Quantumwave Laser unit and will add daily home treatments to her weekly colonics, hoping to enable the bowel to work on its own again.

-Margie F.

A friend shut her finger in the door. I immediately put the laser on Unwind and later Soothe and Relieve, using the red probe on the finger. She said the throbbing stopped. Later that day, she commented how amazed she was that it had not swelled up and that it did not hurt.

-Melanie W.

I suffered from chronic psoriasis on my right ankle for years. I tried various creams but nothing helped. I tried the laser two or three times a week for about a month. The condition cleared up and has not returned.

-John P.

It is now two years since I arrived in Cobham limping. My right hip and right foot were very painful. Treatment sessions to both areas left me immediately pain free. The miracle is that I remain pain free and have had no need to revisit either area for further treatment.

-Simeon H.

A 67-year-old gentleman is a patient of mine. He had painful, arthritic hands and was unable to grip. I treated him for a week with the laser. On the first day, I used the Unwind protocol with the base unit, and then used the violet probe with the Pleo protocol on both hands. For the following six days, I used the Unwind protocol, and again with the violet probe used Pleo, Relieve and Ozone. His hands decreased in size, the edema was diminished, and his mobility and grip were fantastic. The pain was gone. The gentleman said "Gardening no more is a chore; it is now a joy."

-Dr. Patricia L.

I have a 74-year-old client who had a hip replaced two years ago. Since the operation, she has been in pain. She received three treatments with the laser, working over the hip area using Unwind for twenty minutes. The pain has disappeared.

-Teresa A.

A client came who had experienced shoulder problems for many years. She had already tried several other complementary therapies without any success. On her first treatment, SPP was used along with the laser with the red and infra-red probes using Muscle and Bone settings. The violet probe was used to finish the treatment. When she came for her second treatment, she reported that she had no pain at all for two days and then it had returned to a lesser degree. After the following four treatments, the client reported a general reduction of the pain.

-Pat P.

I have a 77-year-old female client with arthritis, osteoporosis, diabetes, and angina. Suffering from pain and restriction of movement in the neck, she was told by her general practitioner that nothing could be done. After six treatments using Activate and Rejuv on the neck, she has much improved movement and is now able to drive again. She feels her life has been given back to her.

-Norma M.

After eight years of having a skin condition on my left leg and seeing numerous dermatologists, homeopaths and my general practitioner with no successful results, I tried the laser. I started to notice a change immediately. It became less itchy. Now, I have a healed leg with no irritation.

I have had amazing results after treating a 50-year-old male who had a painful hip and lower back. Nothing he tried over nine months had helped. After using the laser set to Unwind and Quantum, he couldn't believe the change. After two more treatments, he was pain free and able to return to his golf game.

-Rose H.

One of my clients came to me following a car accident that occurred three years before. She had been unable to work because of pain and headache. She had not been able to sleep and was becoming depressed. Doctors could not find anything wrong with this young 24-year-old. I gave her a 45 minute treatment using the basic protocol of

Unwind with the probe directly on the neck. She fell asleep! When she woke up, she had no pain and could turn her head. After a few more treatments, she was feeling good and was sleeping.

-Suzie T.

On my way home after a weekend conference, I was very tired. I had problems staying awake driving on the motorway. I had the laser in the car, and I used it on Chakra. Within five minutes I had full concentration and energy to continue my journey safely.

-Rita P.

I had problems with a ligament in my arm caused by heavy work. It was very painful. I used the laser set to Endorphins, Ligaments, and Ozone. Afterward, I felt no pain for the rest of the week.

-Ignace V.

I had laser periodontal surgery. I had severe pain on the left side for two weeks and could only eat soup. Later, when surgery was done on the right side, I used the Quantumwave laser. I went to a pot luck dinner the next afternoon with no pain!

-Donna W.

My friend broke her foot in my home. Two months after surgery, bone healing was not taking place. Even the bone stimulator from the hospital was not helping. Her bone started to heal only after she started using the laser! The pain and scar are now gone. Thank you.

-Victoria L..

I use the laser in my practice which is a medical/integrative practice. We offer a variety of alternatives: biofeedback, ozone therapy treatments, etc. The Scalar Laser is one of our most popular treatments and we use it for a variety of issues as standalone and adjunct therapy.

-Janet L.

I have an eleven year old female golden retriever who injured her spine and was unable to lie down. She was whimpering and didn't want me to move or even touch her. I used my Quantumwave laser for sixteen minutes. She stretched yawned, lay down without pain and promptly fell asleep! Wow! Thank you. Thank you. Thank you.

-Chris B.

I have been fortunate to work with the laser for two years now. I was working with a minister in the Chinese government with 90% hearing loss. After one month of just using Unwind on the auditory canal using the violet and red probes, her hearing improved 10db with a clinical baseline taken before and after the therapy.

-Adam M.

A year ago, my right shoulder was frozen and extremely painful! The scalar laser opened it up and diminished the pain so I required no pain medications. I used other modalities at the same time, including biofeedback and Japanese acupuncture. But I found the laser was best for diminishing pain and increasing mobility.

-Lou H.

I have had my laser about two years, and I use it with all my clients. My most significant experience involves a client who had a car accident eight years ago. She had been in chronic pain for eight years. After two sessions of using the laser on the Unwind and Quantum protocols, her pain level went from 8 down to 1-2. It has stayed there. For the first time, she has been able to sleep and work without chronic pain.

-Debbie I.

My thirteen-year-old dog had a stroke. She lost her balance and was weak in her back legs. I used the laser on her with the Unwind and Ozone protocols. After two to three weeks, she was as good as new.

-Angela R.

A young girl I know has recently had a little baby girl. As a result of her pregnancy, she had a lot of stretch marks. As she used the laser, she started to notice a significant improvement in the size, number, and color of her stretch marks. She started working on only one side so that she could see the difference between the two sides. Now she is treating both sides!

-Shane R.

Two months after a total knee replacement, I went to the Advanced SCIO training with Levi Baxa. After the first day of class, my knee was red, hot, swollen, and so painful. I could hardly walk. Levi told me to take the laser and use it that night. After ten minutes, the pain was gone. I continued to use it throughout the week at night and bought one when I left. It has served my family and my clients well! I love my laser.

-Maribeth S.

I have been using my laser for a year. I like how it affects my mood and puts me in a calm and relaxed state. I also started to use it on my skin for facial wrinkles and acne. I have started to receive compliments on my appearance. Thank you for your wonderful invention.

-Elena F.

I use the scalar wave laser to open the body before Indigo sessions. It prepares my clients to receive and shift with ease and grace. I also use it for trauma, acne, and emotional events. I love it.

-Margaret U.

The laser has helped me to relax and has removed pain in my body. A month ago, I stubbed my toe and could hardly walk. I held the laser on my toe using Unwind and Quantum. My toe became pain free within half an hour. Last night, my lower back hurt and I held it on my sacrum for one hour, switching between Disc, Ozone and Neuromuscular. Now I am pain free.

-Dawn S.

As a massage therapist, my wrists and thumbs are under pressure stress. They have been aching at the end of the day for several months. I would experience sharp shooting pains while doing massages. I started using Unwind and Quantum after each massage and have been pain free for several weeks now! Yea!

-Tamara K.

I have a tooth that had been giving me some pain. I started using the laser and probes on my teeth, and the pain was gone after the first treatment.

-Michelle

My husband has played at a high level of tennis for forty years. He's lived with a very stiff neck for quite a while. He started on laser therapy with a practitioner in town. A chiropractor in the same office suggested he get x-rays which showed a significant amount of arthritis. By the time he started laser therapy, he was developing pain with any movement of his neck. By the second treatment, he had better motion in his neck and less pain. After the fourth session, he had no pain and 80% improvement in motion. Three months later, he has kept the motion and experiences no pain. We own a laser now so he can treat himself.

I've been active physically all my life and I'm 61 years old. I raced go-carts. I've been a snow ski instructor and a tennis instructor. And, now I ride horses. It has taken a toll on my back. I use the Relieve setting up and down my back every day. I am experiencing less pain.

-Jan L.

After years of not sleeping well and waking up throughout the night, I am finally sleeping well and waking rested. This is just from using the Unwind protocol.

-Diane C.

Prior to using the laser, I was experiencing some hair loss. Being a health practitioner, I know low functioning thyroid can be a cause. I put the laser on Thyroid and placed it on my thyroid three times a night for about a week. Lately, I noticed there is no hair on the couch anymore.

-Felicia S.

I have a client with a rash that would not go away. With one session set to Ozone, the rash was 80% gone. After the second session, it was gone on day three.

I used the laser on my dad who has prostate cancer and cancer of the bone. He is in a lot of pain. They have now bought their own laser because of the relief that the laser gives to his spine.

-Penny T.

I have been using my laser to loosen and restore movement in my thumbs which have become more and more rigid from arthritis. It is amazing to see the increased mobility.

-Phyllis G.

I have a cyst on my left index finger. I went to two doctors and they both suggested I see a hand surgeon. I started using my laser three weeks ago, and the cyst is half the size. I plan to continue using the laser and will not get the surgery.

-Jan T.

I had a chronic cough since May, 2010. I was on steroids which caused some terrible side effects including weight gain, lack of sleep, and loss of energy. There was an increase in side effects, but no improvement in the cough. In January, 2011, we received our Quantumwave Laser. The difference is night and day. My cough is nearly gone and I am sleeping. There is such a difference. I use the Quantumwave Laser on not only the acupressure points but also on the center of my chest just below my throat. I can almost feel the cough breaking up as I use it. It is wonderful. I am so much better.

-Marion D.

I used the laser to help with problems due to a former head injury. After using the violet probe on my occiput and TMJ joints, I experienced a clear and noticeable release of tension, resulting in improved rotation and lateral tilting. I used Quantum for twenty minutes on the various points.

-Chad A.

My first experience with laser therapy was about two years ago when I had a fall and injured soft tissue on my lower rib cage area. It was hard to breathe deeply without pain. After a thirty minute laser treatment, I was able to breathe deeply. After one more treatment, all discomfort was gone. I have had no recurring discomfort with this injury.

My second experience with laser treatment took place this past October, 2010. A podiatrist confirmed by x-ray and ultrasound that I have a bone spur on the top of my foot. By the time I consulted a podiatrist, I had been experiencing pain for three months that interfered with everything I did, including my sleep. Surgery was inevitable. I decided to see if laser therapy could alleviate some of the pain. My first treatment lasted thirty minutes. The next day, I came in for a fifty minute session. I had no pain at all after the second treatment. As far as I know, the spur is still there, but I have no discomfort at all.

-Dottie T.

I had a client who had a gallbladder attack and was in severe pain. We used the laser on Unwind and Gallbladder, and the pain dissolved.

-Michelle

A client fell on ice, hit his head, and had a concussion. He was also experiencing lots of pain in the neck area and shoulders. I used Unwind and Quantum for twenty minutes on both sides. It released the pain and the movement of his head was restored.

-Tamara K.

I am a P.T. and massage therapist. I had a client with Achilles tendinopathy. The doctors wanted to do surgery for the second time because of recurring pain and re-injury. I applied the laser to her foot and used the Unwind protocol. I also did my body work to relieve structural imbalance. She is now doing the Iron Man competition and has no pain in her ankle or foot.

We adopted a 6-month-old puppy, and two weeks later she was diagnosed with distemper. There is no cure for this, and it has an 80% fatality rate. I used the laser at least twice a day on her. She went from being unable to walk, sit, or stand to running and playing tug of war with a one year old Great Dane. The vets we have seen are amazed at her recovery.

-Leslie S

After a brown recluse bite, I used the Quantumwave Laser on my leg. The healing was so effective that I had minimal tissue deterioration.

-Charlie W.

I received the DVD set yesterday!!! Wow!! I watched the first disc this morning and it is fantastic!! I don't know if I told you but my husband fell down some stairs and really damaged his knee. At that point, I had not told him about purchasing the Laser as I did not want any negative energy directed to it until I had worked with it enough myself.

But I could not let the chance go by to see how the Laser would work and to help alleviate his pain, if that was possible. So I brought it out!! He used it from Thursday until Sunday, each day with less pain (it started at 12+ on a scale of 1 - 10) and by Monday he was walking on it and taking nothing but an Alleve if there was slight pain. He says that, in fact, the knee feels better now than before he hurt it. Interesting!!!! Now we have to "coordinate" who gets to use the Laser - me, my clients, our little Shih Tzu (who loves it) or my husband. He is all excited to watch the videos and is opening up to all kinds of new thought processes!!!! Yea!!

AT A CONVENTION I WAS HANDED THE VIOLET PROBE WHILE A REP. STEPPED AWAY FROM HIS TABLE FOR 3-4 MINUTES. THE PAST 3- YEARS I HAD A SWOLLEN, ARTHRITIS LIKE THUMB, BLACKISH IN COLOR, VERY PAINFULL AND ALMOST COULD NOT MOVE IT. I USED THE PROBE ON IT. THE NEXT MORNING MY THUMB WAS FINE. I WAS ASTOUNDED! I STARTED MAKING CALLS AND HAD MY LASER IN 4 DAYS. MY THUMB IS STILL FINE. SIATIC NERVE PAIN (FOR 4 MONTHS) IS GONE. ARTHRITIC PAIN IN LOWER BACK, PELVIS, LEG & ARMS IS GONE. A SCALE LIKE GROWTH ON TEMPLE AREA HAS DISAPPEARED. I HAD VERY DARK BROWN SPOTS ON MY HAND AND ARMS - THEY HAVE FADED APROX 85% I HAVE MORE ENERGY AND JUST A FEELING OF OVERALL WELL-BEING. MY HUSBAND HAD PAIN IN HIS KIDNEY AREA AND TAILBONE FOR 4 MONTHS AFTER AN INJURY WHILE RIDING A STATIONARY BIKE. AFTER USING THE LASER HE NO LONGER HAS THE PAIN AND IS BACK TO EXERCISING. I AM A DOWSER AND USE A VERY SENSITIVE TOOL CALLED AN AURA-METER. THE AURA-METER WILL NOT PASS THROUGH NEGATIVE ENERGY IN THE ETHERIC BODY - IT FLIPS BACKWARDS. ANY NEGATIVE ISSUES IN THE BODY ARE ALSO PRESENT IN THE ETHERIC BODY. I CALL THE LIVER THE "GARBAGE DUMP OF THE BODY" AND THE AURA METER ALWAYS FLIPS BACK AT THIS ORGAN. I DID AN EXPERIMENT ON MY HUSBAND'S LIVER. THE TOOL FLIPPED BACKWARDS. AFTER AN UNWIND - I WENT TO ORGANS/LIVER AND PLACED THE LASER OVER HIS LIVER 4 FOUR MINUTES. AFTER ONLY 4 MINUTES HIS LIVER WAS CLEAR AND THE AURA METER PASSED THROUGH THE BODY'S ENERGY FIELD JUST FINE.

I am grateful to have been able to take the time this year and look into all the LED's and lasers out there on the market. Our beautiful Dressage horse, Silver, left for greener pasture last March and while I know he is where he needs to be... I've yet been able to walk out to the barn and not silently and sometimes audibly call out his name... I'd say "Silver good buddy did you have a good night?"... for 18 years. He was 27 years young on March 1st at 3:31 AM when he passed. I am so grateful to have been with him. I'm sorry I'm going into too much detail... but part of my physical healing, I pray like my emotional healing, will be helped with Stillpoint. I knew I wanted to help myself with the best technology available. April thru the first of August I searched, studied, inquired, and did all I could do to find out everything I could that would help my body heal. I wanted no more painful steroid injections, surgeries or heavy

medications to only cause me more pain and suffering. Thank you for your superior product. I found the perfect healing laser which included important features like weight, user-friendly battery charge time and of course the ultimate cell memory feature. I wasn't sure how we as a family were going to manage it but we have the one on the way to my Mother who was a nurse for 35 years or so and will be 77 on Thursday. With much gratitude I THANK YOU from my heart of hearts and wish you all the very best.

- Monica M.

I would like to say just how brilliant this laser therapy is. I didn't think for one moment someone pointing a laser at my painful joints could ever do any good. With an already painful back condition and a frozen shoulder it looked as if independent life was truly over, when arthritis in my knee flared up too. I cannot thank you enough for saving me from the wheelchair. Nothing had worked but just a little time spent with you and months of pain vanished. The very next day I was able to move freely and some 10 weeks on still can. Of course the back and shoulder are very damaged and may take a lot longer to fix but to have made any progress on this broken body is nothing short of a miracle.

THANK YOU THANK YOU THANK YOU!

- Trudi H.

I watched the video and read the manuals this morning and had a go with the laser. I've had a lot of back pain lately, and carrying Lucy around for the last few days hasn't helped - though she wasn't very heavy for a Labrador. I used the laser on it for the length of time it took to switch itself off and the pain has gone. Also, I've been unable to move my neck much for the last few weeks, which has made driving a bit difficult at times. I used the laser on it for the same length of time and I can turn my neck 90 degrees left or right without the slightest sensation of pain. How's about that then?

A week ago Wednesday I went to work on my friends horse that has been lame for almost 2 months with no progress. Bucket is his name & he is a 11 year old walker stallion. When I got to the barn he was so lame that he was on three legs. After 40 something years of working with thousands of lame horses I have seen this many times. First thing I did was to use a dowsing tool to pin point areas of need. Now that I have a Quantum Wave Laser the unwind was the first thing I used in that three hour session. Yes I used many different settings such as Quantum, Relieve, Pleo, blood, Ozone as the second round. Finishing up with more detailed parts of his body. Problem being when a horse is lame that long more & more parts of the body join into the lameness problem... Most of the time these things can take weeks or months to get them turned around. That day he was only a little bit better. I came back on Saturday which was 3 days later & again worked for three hours on this horse... When leaving he was about 1/4 better. On Tuesday morning when his owner came to the barn this horse was 80% better and by the weekend "Bucket" was 100% sound. Let's just say right now ...I have my name being passed around to the local horse people with great praise.

- Barb F.

After many years of suffering from fibromyalgia, headaches, and chronic pain, compounded by a major stroke three plus years ago, I decided to purchase the Quantum Wave laser as a possible tool to make my life easier. When I got the laser in January 2011, I had just injured my leg, necessitating a long recovery, and I used the laser on it and had a nearly instant healing! Since then I have been getting stronger and stronger and slowly unwinding from all this pain and misery. Thank you so much, Paul and Lillie, for this wonderful invention.

- Beverly B.

I went to a laser event. Unwind on all the spots, didn't feel much. Quantum didn't feel much. Ozone WOW! I put the laser on the back of my neck and a pain I have had on my left side for 5 years after a surgery disappeared. I am free of pain.

- Marsha A.

After years of giving and receiving many forms of bodywork and energy work and meditating I have been stunned at how quickly the laser unwinding session brings me & my clients into stillpoint. That deep peaceful break in the day is so important but it's hard to get an extra hour to do the other modalities, whereas just a few minutes of laser time can take you to that blissful place. I manage the stress in my life much better when unwinding is part of my daily routine.

- Libbie H.

I was asked by a friend of a friend to come & work on a rescued 20 year old horse. She had been in the new home for a few weeks & was found in the pasture with 1/2 her face ripped & hanging with a pool of blood on the ground. The vet got out pretty quick & stitched her up. The big concern was infection setting in. I had already worked with my own horse who had a bad injury usually requiring antibiotics. I used the laser & colloidal silver with no infection setting in. I felt the laser would also be great in this case. I started with the basic unwind & used a lot of Quantum on the abdomen as the mare had colic twice already. On the face wound I used Ozone, Unity & Facial for about 15 minutes. The next day the owner told me horse layed down & she was afraid of another colic but actually the mare just went into a deep sleep. She felt the swelling was down as well. She also said the attitude was much better. I did more work the next day & actually was just out tonight which is 5 days after the 1st session. The vet had come out & was very pleased. He feels she is not totally out of the woods yet but things are really looking up. The owner feels the laser has done a world of good. She is eating & eliminating well & the swelling is down. Tonight I found the mare extremely alert & if you did not see the stitches you would not notice anything wrong. I feel with laser we can keep this mare free from infection & give her another chance for a good life.
